Re: Third Quarter 2008 Status Report, Atlantic Richfield Company (a BP affiliated company)
Service Station #2185, 9800 International Boulevard, Oakland, California;
ACEH Case #RO0000392

Dear Mr. Supple:

Provided herein is the *Third Quarter 2008 Status Report* for Atlantic Richfield Company Station #2185, located at 9800 International Boulevard (formerly known as East 14th Street), Oakland, California (Site). This report presents a summary of current developments regarding the Site through the Third Quarter 2008.

Should you have questions regarding this submission, please do not hesitate to contact us at (530) 566-1400.

Sincerely,

BROADBENT & ASSOCIATES, INC.

Thomas A. Venus, P.E.
Senior Engineer

Robert H. Miller, P.G., C.HG.
Principal Hydrogeologist

STATION #2185 QUARTERLY GROUND-WATER STATUS REPORT

Facility: #2185	Address: 9800 International Boulevard, Oakland, California
Environmental Business Manager:	Mr. Paul Supple
Consulting Company/Contact Person:	Broadbent & Associates, Inc.(BAI)/Rob Miller & Tom Venus (530)566-1400
Consultant Project No.:	06-08-622
Primary Agency/Regulatory ID No.:	Alameda County Environmental Health (ACEH) ACEH Case #RO0000392

WORK PERFORMED THIS QUARTER (Third Quarter 2008):

1. Prepared and submitted the Second Quarter 2008 Ground-Water Monitoring Report.
2. Implemented the Work Plan for On-Site Soil Investigation dated 16 June 2008. Work performed by Stratus on 18 July 2008.
3. Prepared and submitted the Soil Investigation Report dated 26 August 2008.

WORK PROPOSED FOR NEXT QUARTER (Fourth Quarter 2008):

1. Prepared and submitted the Third Quarter 2008 Status Report (contained herein).
2. No environmental work is scheduled for the site during the Fourth Quarter 2008.

DISCUSSION:

Case closure was requested by BP on 9 September 2003 from ACEH. In a letter dated 25 April 2008, ACEH requested redevelopment and sampling of onsite monitoring wells and drilling of an exploratory boring to test for residual hydrocarbons in soil. On 30 June 2008, BP submitted a Second Quarter 2008 Ground-Water Monitoring Report. Water samples had been collected on 4 June 2008 from wells MW-2 through MW-10. A sample could not be collected from well MW-1 as it has been paved over. Gasoline range organics (GRO) were detected above laboratory reporting limits in two of the nine wells sampled at concentrations of 98 micrograms per liter ($\mu\text{g/L}$) in well MW-3 and 360 $\mu\text{g/L}$ in well MW-6. Methyl-Tertiary Butyl Ether (MTBE) was detected in one of the nine wells sampled at a concentration of 1.8 $\mu\text{g/L}$ in well MW-10. The remaining fuel additives and oxygenates were not detected above their respective laboratory reporting limits in the nine wells sampled. Ground-water elevation contours and the most recent GRO, Benzene, and MTBE concentrations are presented in Drawing 1.

On 26 August 2008, BP submitted the requested Soil Investigation Report containing results obtained from drilling a soil boring to the north of the dispenser islands at the Site. The work was conducted in accordance with the work Plan for On-site Soil Investigation (BAI, 16 June 2008), as approved by ACEH in their letter dated 25 June 2008. No petroleum hydrocarbons were detected in soil samples from 6.0 ft bgs, 7.5 ft bgs, and 9.5 ft bgs from boring B-1, collected in the vicinity of previous soil sample L-9 (6 November 1991) which had contained TPH-G at 5,400 milligrams per kilogram (mg/kg) and Benzene at 22 mg/kg at 9.5 ft bgs. The location of Boring B-1 is provided within Drawing 2.

In a letter dated 17 September 2008 from ACEH, Mr. Paresh Khatri stated that as concentrations of contaminants in ground water appeared low and concentrations of contaminants in the confirmation soil samples collected from boring B-1 were not detected above the laboratory detection limit, the Site appears to qualify for case closure evaluation. The letter continued that the Site will be further reviewed for case closure and that BP would be notified of the results of closure evaluation within 90 days from the date of the letter (by approximately 17 December 2008). BP is awaiting the results of this evaluation.
