RE: Arrow Rentals Service - 187 North L Street, Livermore, CA 94550

Dear Mr. Wickham:

Ground Zero Analysis, Inc (Ground Zero) respectfully requests modification of the Dual Phase Extraction (DPE) system sample routine. The DPE system is currently monitored twice per month with influent groundwater samples and influent vapor samples collected each event as well as PID readings recorded. Effluent groundwater samples are collected on a quarterly basis as required by the sewer discharge permit. Three years of data has been collected using this regime and Ground Zero believes extensive sampling data is no longer required. In an effort to be more cost effective, Ground Zero proposes the current sampling schedule be modified as follows:

- Monthly operation and maintenance of the DPE system;
- Monthly PID readings of the influent and effluent vapor stream;
- Monthly influent groundwater sample collection and analysis; and
- Quarterly influent and effluent vapor sample analyses.

Ground Zero will continue to comply with requirements set forth in sewer discharge and Bay Area Air Quality Management District permits. Please contact me at (209) 522-4119 should you have any questions or need more information.

Thank you,
