San Francisco, CA 94103

SUBJECT: SOIL EXCAVATION AND OFF-SITE DISPOSAL
Emeryville Properties
1400 Park Avenue
Emeryville, California

Dear Mr. Lewerenz:

Aqua Science Engineers, Inc's. (ASE) was contracted by McKay & Company Construction to supply project management services related to the handling/disposal of contaminated soil generated during the construction of a truck dock at the subject site, see Figures 1 and 2.

STOCKPILED SOIL SAMPLING, NOVEMBER 4, 1998

ASE reported to the site on November 4, 1998 to collect a soil sample from the stockpiled soil, an estimated 200 cubic yards. The soil was excavated by Siteworks Construction, Inc. for a future truck dock. ASE was called to the site due to the presence of areas of stained and odorous soil within the excavation. This estimated 200 cubic yards represented soil from just below the concrete surface to a depth of approximately 4-feet below ground surface (bgs). Soil samples STK-A, STK-B, STK-C and STK-D were collected from within the soil pile and later composited by the laboratory and reported as STK (A-D). These samples were analyzed by Chromalab, Inc. of Pleasanton, CA (ELAP #1094) for total petroleum hydrocarbons as gasoline (TPH-G) by EPA Method 8015, total extractable petroleum hydrocarbons (TEPH) as diesel and motor-oil by EPA Method 8015, volatile organic compounds (VOCs) by EPA Method 8010, MTBE and BTEX by EPA Method 8020, total lead, WET lead, and total chromium by EPA Method 6010. The analytical results are tabulated in the Tables Section; the analytical report is attached in Appendix A.

SOIL PROFILING

The analytical results for the November 4, 1998 sampling were used to profile the soil into a local landfill. On November 17, 1998, ASE received confirmation from Forward, Inc. landfill in Manteca, California that the soil was suitable for acceptance as Class II, non-hazardous waste.

SOIL TRANSPORTATION AND DISPOSAL, NOVEMBER 19, 1998

On November 19, 1998 Siteworks Construction loaded trucks supplied by Denbeste Transportation for transport to the Forward, Inc. landfill in Manteca, CA where the soil was accepted as Class II, non-hazardous waste. On November 19, 1998, 257.78 tons of soil was removed from the site. See Appendix B for copies of the manifests and a letter from Forward, Inc.

SOIL EXCAVATION AND STOCKPILE SAMPLING, NOVEMBER 19, 1998

Additional soil was removed from the future truck dock area on November 19, 1998 by Siteworks Construction personnel. The additional tonnage represented soil removed to the final excavation depth of approximately 7-feet bgs in some areas. The soil excavated on November 19, 1998 was stockpiled separately from the soil previously excavated. On November 19, 1998, ASE collected a stockpiled soil sample from the newly excavated soil. Soil samples STKP-A, STKP-B, STKP-C and STKP-D were collected from within the soil pile and later composited by the laboratory and reported as STKP (A-D). These samples were analyzed by McCampbell Analytical of Pacheco, California (ELAP #1644) for TPH-G by EPA Method 8015, TEPH as diesel by EPA Method 8015, VOCs by EPA Method 8010, MTBE and BTEX by EPA Method 8020, total lead and total chromium by EPA Method 6010. The analytical results are tabulated in the Tables Section; the analytical report is attached in Appendix A. The analytical results of the November 19, 1998 soil sample allowed for disposal of the soil excavated on November 19, 1998 at Forward, Inc. landfill.

SOIL TRANSPORTATION AND DISPOSAL, NOVEMBER 23, 1998

On November 23, 1998 Siteworks Construction loaded trucks supplied by Denbeste Transportation for transport to the Forward, Inc. landfill in Manteca, CA where the soil was accepted as Class II, non-hazardous waste. On November 23, 1998, 405.25 tons of soil was removed from the site. See Appendix B for copies of the manifests and the Forward, Inc. letter.

SOIL TRANSPORTATION AND DISPOSAL, DECEMBER 2, 1998

On December 2, 1998 Siteworks Construction loaded trucks supplied by Denbeste Transportation and Dellafosse Trucking for transport to the Forward, Inc. landfill in Manteca, CA where the soil was accepted as Class II, non-hazardous waste. On December 2, 1998, 184.31 tons of soil was removed from the site. See Appendix B for copies of the manifests and and the Forward, Inc. letter.

BOTTOM OF EXCAVATION SAMPLING, NOVEMBER 24, 1998

ASE collected four soil samples from the bottom of the excavation after overexcavation activities were completed by Siteworks Construction. Soil samples EB-N, EB-S, EB-W and EB-E were collected from the north, south, west, and eastern portions of the excavation bottom, respectively. These samples were analyzed by Chromalab for TPH-G by EPA Method 8015, TEPH as diesel and motor-oil by EPA Method 8015, VOCs by EPA Method 8010, MTBE and BTEX by EPA Method 8020, total lead and total chromium by EPA Method 6010. The analytical results are tabulated in the Tables Section; the analytical report is attached in Appendix A. No TPH-G, TEPH, VOCs, MTBE or BTEX was identified in any of the samples. No lead or chromium was detected above background levels.

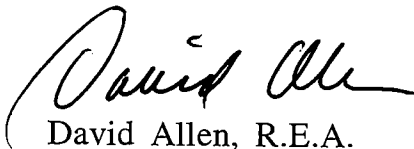

CONCLUSIONS

A total of 847.34 tons of overexcavated soil was removed from the subject site and disposed of at the Forward, Inc. landfill facility in Manteca, California as Class II non-hazardous soil. Confirmation soil samples collected at the bottom of the excavation contained no detectable concentrations of TPH-G, TEPH, VOCs, MTBE or BTEX. No lead or chromium was detected above background levels. It is the opinion of ASE that no further environmental activities regarding this area of the site are warranted.

Should you have any questions or comments, please feel free to call me at (925) 820-9391.

Respectfully submitted,

AQUA SCIENCE ENGINEERS, INC.

David Allen, R.E.A.
Senior Project Manager

11/25/98

Dear Greg:

Enclosed are:

- 1). the results of 1 samples from your **Emeryville Property; 1400 Park Ave** project,
- 2). a QC report for the above samples
- 3). a copy of the chain of custody, and
- 4). a bill for analytical services.

All analyses were completed satisfactorily and all QC samples were found to be within our control limits. If you have any questions please contact me. McCampbell Analytical Laboratories strives for excellence in quality, service and cost. Thank you for your business and I look forward to working with you again.

Yours truly,

Edward Hamilton, Lab Director

Re: TPH analyses for project Emeryville Properties

Dear Dave:

Included is a summary which describes the carbon ranges and related results for gasoline, diesel, and motor oil for submission 9811068, project Emeryville Properties.

TPH reportables for sample STK-(A-D) (9811068-213910) are the following:

Gasoline	C ₇ -C ₁₂	4.2 mg/Kg
Diesel	C ₁₀ -C ₂₄	43 mg/Kg
Motor Oil	C ₂₄ -C ₄₄	57 mg/Kg

If you have further questions, please do not hesitate to call Pierre Monette or me at (925) 484-1919.

Sincerely,
ChromaLab, Inc.

Re: **FORWARD, INC.** Approval No. 774422
Hydrocarbon Contaminated Soil from
Emeryville Properties
1400 Park Ave., Emeryville, CA

Dear Mr. Allen:

FORWARD, INC. is pleased to confirm the disposal of 847.34 tons of material as referenced above. The material was received at our Manteca, California facility for disposal on 11/19/98, 11/23/98, 11/24/98 and 12/2/98. Five loads of the referenced material (105.55 tons) was not hauled by DenBeste Transportation. The material was placed in a Class 2 waste management unit.

Approval for this material was based on the information provided in the waste profile and associated materials submitted by Aqua Science Engineers, Inc. on behalf of Emeryville Properties (Generator). Acceptance of the waste is subject to the "Terms and Conditions" agreed to and signed by the Generator on the Waste Profile Form.

Thank you for the opportunity to be of service. Should you have any questions regarding this matter, please contact me or Customer Service at (800) 204-4242.

Sincerely,

FORWARD, INC.

Brad J. Bonner
Sales Manager

Forward shall have no obligation to accept the waste if weather or other conditions impair the safe and effective disposal of the waste or if the waste impairs the safe and effective operation of the Landfill. Forward shall use reasonable efforts to promptly notify Disposer of its inability to accept the waste for any reason. If Forward's refusal to accept the waste is based on weather or other site conditions, Forward shall notify the Disposer when site conditions are expected to change such that Forward will be able to accept the waste.

FACILITY REQUIREMENTS

FORWARD INC. LANDFILL

Forward shall have no obligation to accept the waste if weather or other conditions impair the safe and effective disposal of the waste or if the waste impairs the safe and effective operation of the Landfill. Forward shall use reasonable efforts to promptly notify Disposer of its inability to accept the waste for any reason. If Forward's refusal to accept the waste is based on weather or other site conditions, Forward shall notify the Disposer when site conditions are expected to change such that Forward will be able to accept the waste.

FACILITY REQUIREMENTS

FORWARD INC. LANDFILL

Forward shall have no obligation to accept the waste if weather or other conditions impair the safe and effective disposal of the waste or if the waste impairs the safe and effective operation of the Landfill. Forward shall use reasonable efforts to promptly notify Disposer of its inability to accept the waste for any reason. If Forward's refusal to accept the waste is based on weather or other site conditions, Forward shall notify the Disposer when site conditions are expected to change such that Forward will be able to accept the waste.

FACILITY REQUIREMENTS

FORWARD INC. LANDFILL

Forward shall have no obligation to accept the waste if weather or other conditions impair the safe and effective disposal of the waste or if the waste impairs the safe and effective operation of the Landfill. Forward shall use reasonable efforts to promptly notify Disposer of its inability to accept the waste for any reason. If Forward's refusal to accept the waste is based on weather or other site conditions, Forward shall notify the Disposer when site conditions are expected to change such that Forward will be able to accept the waste.

FACILITY REQUIREMENTS

FORWARD INC. LANDFILL

Forward shall have no obligation to accept the waste if weather or other conditions impair the safe and effective disposal of the waste or if the waste impairs the safe and effective operation of the Landfill. Forward shall use reasonable efforts to promptly notify Disposer of its inability to accept the waste for any reason. If Forward's refusal to accept the waste is based on weather or other site conditions, Forward shall notify the Disposer when site conditions are expected to change such that Forward will be able to accept the waste.
