ACEH Case #RO0000403

Dear Mr. Supple:

Provided herein is the *First Quarter 2008 Semi-Annual Ground-Water Monitoring Report* for Former BP Service Station #11133 located at 2220 98<sup>th</sup> Avenue, Oakland, California (Site). This report presents the results of ground-water monitoring conducted at the Site during the First Quarter of 2008.

Should you have questions regarding the work performed or results obtained, please do not hesitate to contact us at (530) 566-1400.

Sincerely,

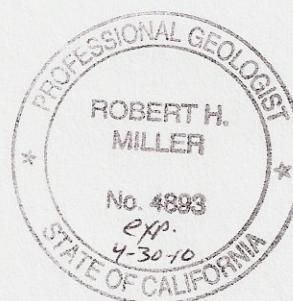

BROADBENT & ASSOCIATES, INC.

## STATION #11133 SEMI-ANNUAL GROUNDWATER MONITORING REPORT

Facility: #11133	Address: 2220 98 <sup>th</sup> Avenue, Oakland
Environmental Business Manager:	Mr. Paul Supple
Consulting Co./Contact Persons:	Broadbent & Associates, Inc.(BAI)/Rob Miller & Tom Venus (530) 566-1400
Primary Agency/Regulatory ID No.:	Alameda County Environmental Health (ACEH) ACEH Case #RO0000403
Consultant Project No.:	06-08-656
Facility Permits/Permitting Agency:	NA

### WORK PERFORMED THIS QUARTER (First Quarter 2008):

1. Prepared and submitted Fourth Quarter 2007 Status Report.
2. Conducted semi-annual ground-water monitoring/sampling for First Quarter 2008. Work performed by Stratus Environmental, Inc. (Stratus) on 15 January 2008.

### WORK PROPOSED FOR NEXT QUARTER (Second Quarter 2008):

1. Prepared and submitted this First Quarter 2008 Semi-Annual Ground-Water Monitoring Report (contained herein).
2. Conduct ground-water monitoring/sampling for wells AW-1, AW-2, AW-4, AW-5, AW-6, MW-1, MW-3, RW-1, and VEW-4. Refer to the discussion section for further details.
3. Commence Nitrate/Sulfate Injection Feasibility Pilot Study.

### QUARTERLY RESULTS SUMMARY:

Current phase of project:	<u>Ground-water monitoring/sampling/treatment pilot study</u>
Frequency of ground-water monitoring:	<u>Semi-Annually (1Q &amp; 3Q): Wells MW-1, MW-2, MW-3, AW-1 through AW-9, RW-1</u>
Frequency of ground-water sampling:	<u>Semi-Annually (1Q &amp; 3Q): Wells MW-1, MW-3, AW-1, AW-4, AW-5, AW-6, and RW-1</u> <u>Annually (1Q): Well AW-2</u> <u>Not Sampled: Wells MW-2, AW-3, AW-7, AW-8, AW-9</u>
Is free product (FP) present on-site:	<u>No</u>
FP recovered this quarter:	<u>None</u>
Current remediation techniques:	<u>NA</u>
Depth to ground water (below TOC):	<u>10.96 ft (MW-1) to 18.83 ft (MW-2)</u>
General ground-water flow direction:	<u>West-Southwest</u>
Approximate hydraulic gradient:	<u>0.006 ft/ft</u>

### DISCUSSION:

First Quarter 2008 semi-annual ground-water monitoring and sampling was conducted at Station #11133 on 15 January 2008 by Stratus. Water levels were gauged in 12 of the 13 wells scheduled to be gauged at the Site. Stratus reported that well AW-7 could not be located (This well has not been able to be located since First Quarter 2001). Wells VW-1 through VW-3 and VEW-4 through VEW-9 were also gauged following demolition activities at the Site during the Fourth Quarter of 2007. No other irregularities were noted during water level gauging. Depth to ground-water measurements ranged from 10.96 ft at well MW-1 to 18.83 ft at well MW-2. Resulting ground-water surface elevations ranged from 23.54 ft above mean sea level in well MW-3 to 16.67 ft at well MW-2. Water level elevations were between historic minimum and maximum ranges for each well, as summarized in Table 1, with the

exception of well MW-2 which reached a historic minimum elevation this quarter. Water level elevations yielded a potentiometric ground-water flow direction and gradient towards the west-southwest at approximately 0.006 ft/ft. Ground-water monitoring field data sheets are provided within Appendix A. Measured depths to ground-water and respective ground-water elevations are summarized in Table 1. Current and historic ground-water flow directions and gradients are provided in Table 3. Potentiometric ground-water elevation contours are presented in Drawing 1.

Generally consistent with the current ground-water sampling schedule, water samples were collected from nine wells: AW-1, AW-2, AW-4, AW-5, AW-6, MW-1, MW-3, RW-1, and VEW-4. A sample was collected from well VEW-4 in advance of nitrate/sulfate injection pilot testing. Each of the wells sampled during First Quarter 2008 will be sampled during the upcoming nitrate/sulfate injection pilot test. No irregularities were reported during sampling. Samples were submitted under chain-of-custody protocol to Test America Analytical Testing Corporation (Morgan Hill, California), for analysis of Gasoline Range Organics (GRO, C4-12) by the LUFT GCMS Method; for Benzene, Toluene, Ethylbenzene, and Total Xylenes (BTEX) by EPA Method 8260B; and tert-Amyl methyl ether (TAME), tert-Butyl alcohol (TBA), Di-isopropyl ether(DIPE), 1,2-Dibromomethane (EDB), 1,2-Dichloroethane (1,2-DCA), Ethanol, Ethyl tert-butyl ether (ETBE), and Methyl tert-butyl ether (MTBE) by EPA Method 8260B. Bio-degradation parameters including dissolved oxygen, oxygen reduction potential, conductivity, pH, temperature, total alkalinity, nitrate, sulfate, soluble sulfide, carbon dioxide, methane, manganese and ferrous iron were also monitored during this quarter. The laboratory reported that the GRO concentrations for the samples collected from wells AW-5 and AW-6 were partly due to individual peak(s) in the quantitation range. The nitrate analysis for the samples collected from wells AW-1 and AW-4 was conducted after the holding time expired. The laboratory also reported that each sample was received after the holding time had expired for soluble sulfide and ferrous iron analyses. No other irregularities were encountered during laboratory analysis of the samples. Ground-water sampling field data sheets and the laboratory analytical report, including chain-of-custody documentation, are provided in Appendix A.

Gasoline range organics (GRO) were detected above the laboratory reporting limits in eight of the nine wells sampled at concentrations up to 5,000 micrograms per liter ( $\mu\text{g/L}$ ) in well AW-1. Benzene was detected above the laboratory reporting limit in seven of the nine wells sampled at concentrations up to 900  $\mu\text{g/L}$  in well AW-2. Toluene was detected above the laboratory reporting limit in four of the nine wells sampled at concentrations up to 87  $\mu\text{g/L}$  in well AW-2. Ethylbenzene was detected above the laboratory reporting limit in six of the nine wells sampled at concentrations up to 490  $\mu\text{g/L}$  in well AW-1. Total Xylenes were detected above the laboratory reporting limit in five of the nine wells sampled at concentrations up to 200  $\mu\text{g/L}$  in well AW-1. TAME was detected above the laboratory reporting limit in five of the nine wells sampled at concentrations up to 45  $\mu\text{g/L}$  in well AW-1. TBA was detected above the laboratory reporting limit in well AW-5 at a concentration of 200  $\mu\text{g/L}$ . MTBE was detected above the laboratory reporting limit in eight of the nine wells sampled at concentrations up to 230  $\mu\text{g/L}$  in well AW-1. The remaining fuel additives and oxygenates were not detected above their laboratory reporting limits in the nine wells sampled this quarter. A summary of bio-degradation parameters is provided in Table 4.

Detected analyte concentrations were within the historic minimum and maximum ranges recorded for each well, with the following exceptions: the GRO, benzene, and ethylbenzene concentrations reported in well AW-2 were the highest on record for this well; the TAME concentration reported in well AW-6 was the lowest on record for this well; the MTBE concentration reported in well MW-1 was the lowest on record for this well; and the toluene, ethylbenzene, total xylene and MTBE concentrations reported in well RW-1 were the lowest on record for this well. Historic laboratory analytical results are summarized in Table 1, Table 2 and Table 4. A copy of the laboratory analytical report, including chain-of-custody documentation is provided in Appendix A. First Quarter 2008 groundwater monitoring data

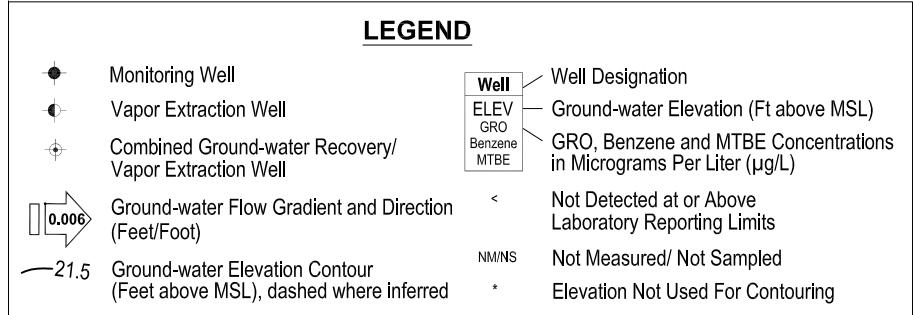

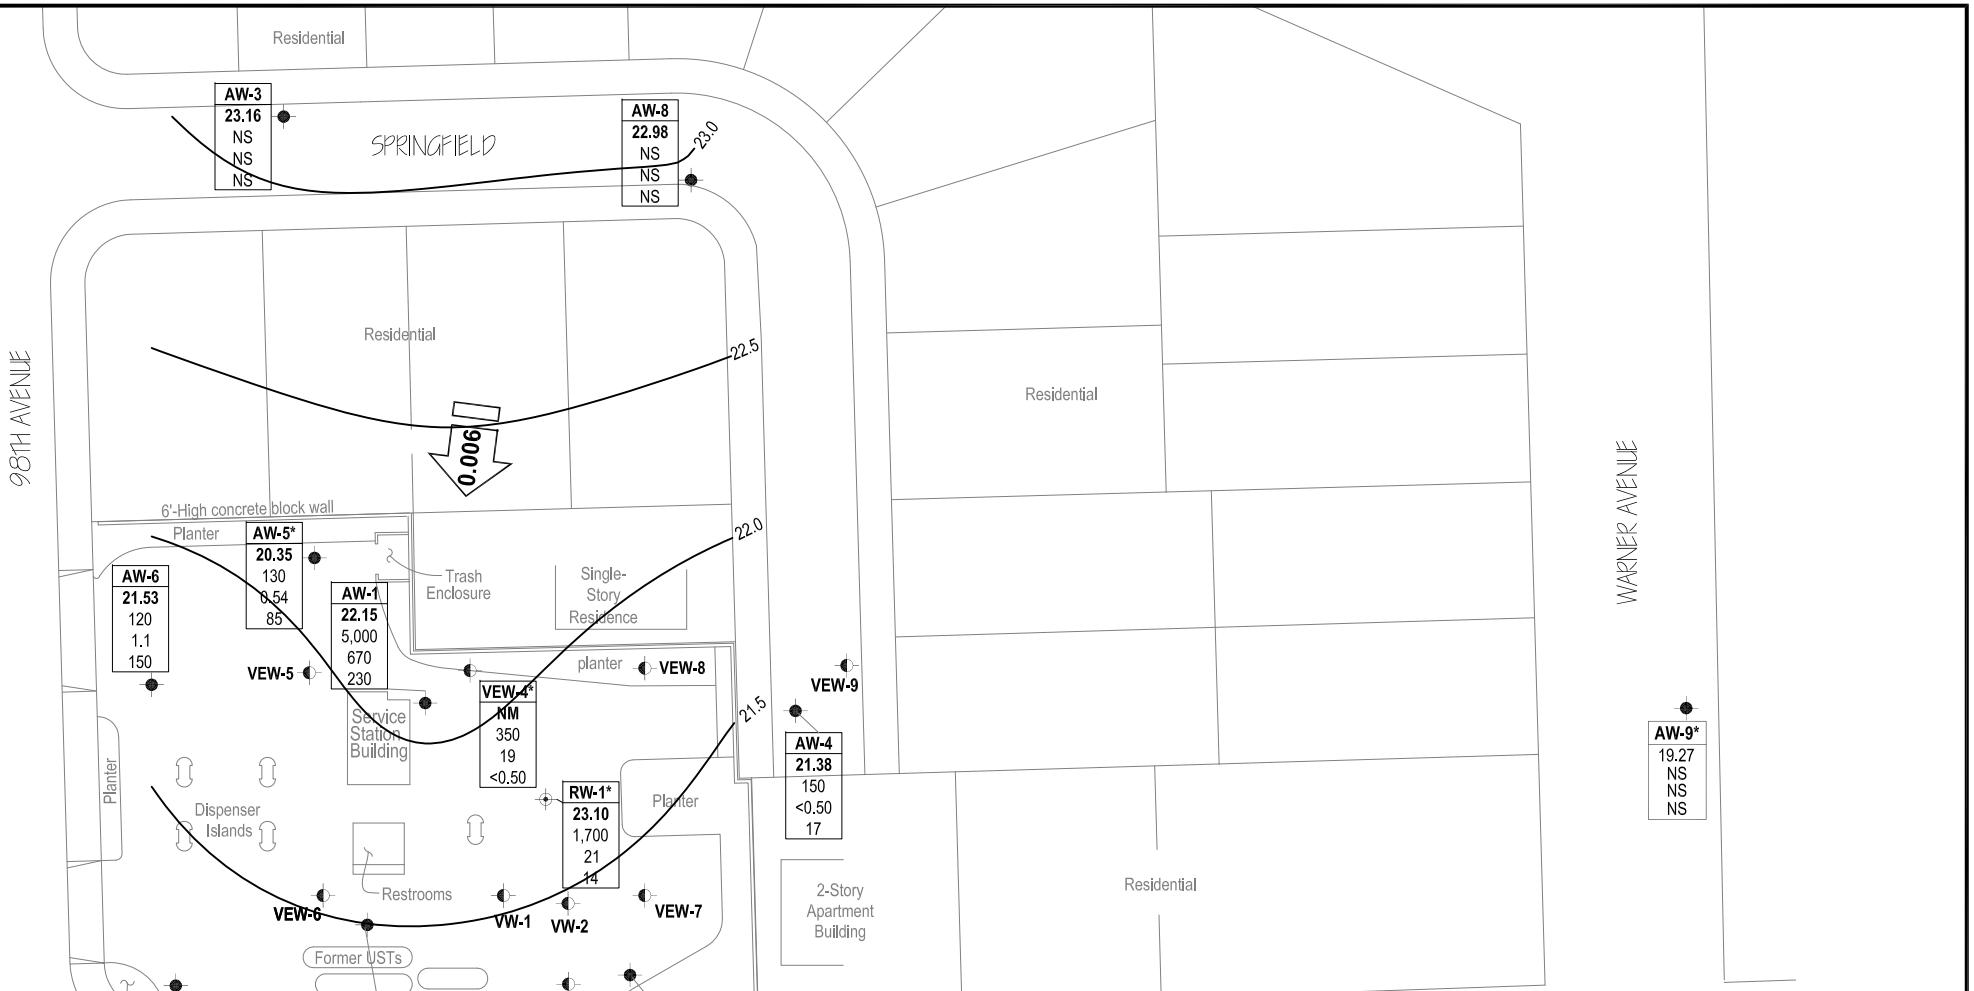

(GEO\_WELL) and laboratory analytical results (EDF) were uploaded to the GeoTracker AB2886 Database. Upload confirmation pages are provided in Appendix B.

## CLOSURE:

The findings presented in this report are based upon: observations of Stratus field personnel (see Appendix A), the points investigated, and results of laboratory tests performed by Test America (Morgan Hill, California). Our services were performed in accordance with the generally accepted standard of practice at the time this report was written. No other warranty, expressed or implied was made. This report has been prepared for the exclusive use of Atlantic Richfield Company. It is possible that variations in soil or ground-water conditions could exist beyond points explored in this investigation. Also, changes in site conditions could occur in the future due to variations in rainfall, temperature, regional water usage, or other factors.

**ABBREVIATIONS & SYMBOLS:**

-- = Not analyzed/applicable/measured/available

< = Not detected at or above specified laboratory reporting limit

DO = Dissolved oxygen

DTW = Depth to water in ft bgs

ft bgs = Feet below ground surface

ft MSL = Feet above mean sea level

GRO = Gasoline range organics

GWE = Groundwater elevation in ft MSL

mg/L = Milligrams per liter

MTBE = Methyl tert-butyl ether

NP = Well not purged prior to sampling

P = Well purged prior to sampling

TOC = Top of casing in ft MSL

TPH-g = Total petroleum hydrocarbons as gasoline

µg/L = Micrograms per liter

ANA = Anametrix, Inc.

PACE = Pace, Inc.

ATI = Analytical Technologies, Inc.

CEI = Ceimic Corporation

SPL = Southern Petroleum Laboratories

SEQ/SEQM= Sequoia Analytical/Sequoia Morgan Hill Laboratories

**FOOTNOTES:**

c = A copy of the documentation for this data is included in Appendix C of Alistoreport 10-025-13-003.

d = MTBE peak. See documentation in Appendix C of Alisto report 10-025-13-003.

e = Blind duplicate.

f = Well inaccessible.

g = EPA Methods 8020/8260 used.

h = Well not monitored and/or sampled due to vapor extraction system.

i = Travel blank.

j = This gasoline does not include MTBE.

k = Well was sampled on a different date from the other wells due to lack of proper equipment.

l = Unable to sample due to nature of product.

m = A copy of the documentation for this data is included in Blaine Tech Services, Inc., Report 010724-B-2. The data for sampling events January 14, 1993 and April 22, 1993 has been destroyed. No chromatograms could be located for samples AW-2 on January 27, 1994, and for samples AW-1, AW-2, AW-3, AW-4, AW-5, AW-6, AW-7, AW-8, MW-2 and MW-3 on September 9, 1994.

n = On June 1, 2001, after reviewing chromatograms, Sequoia reported the value as <5.0.

o = Unable to locate well.

p = TPH-g data analyzed by EPA Method 8015B modified; BTEX and MTBE by EPA Method 8021B

q = TPH-g, BTEX, and MTBE analyzed by EPA method 8260B beginning on the third quarter 2003 sampling event 07/07/03.

r = Discrete peak at C5.

t = Well was not gauged during the quarter due to an oversite by the technician.

u = Sheen in well.

v = Well was dry.

w = Hydrocarbon result partly due to individ. peak(s) in quant. range.

**NOTES:**

Beginning in the fourth quarter 2003, the laboratory modified the reported analyte list. TPH-g was changed to GRO. The resulting data may be impacted by the potential of non-TPH-g analytes within the requested fuel range resulting in a higher concentration being reported.

Beginning in the second quarter 2004, the carbon range for GRO was changed from C6-C10 to C4-C12.

Values for DO and pH were obtained through field measurements.

GWEs adjusted assuming a specific gravity of 0.75 for free product

Note: The data within this table collected prior to April 2006 was provided to Broadbent & Associates, Inc. by Atlantic Richfield Company and their previous consultants. Broadbent & Associates, Inc. has not verified the accuracy of this information.

**ABBREVIATIONS & SYMBOLS:**

-- = Not analyzed/applicable/measured/available  
< = Not detected at or above specified laboratory reporting limit  
1,2-DCA = 1,2-Dichloroethane  
DIPE = Di-isopropyl ether  
EDB = 1,2-Dibromoethane  
ETBE = Ethyl tert-butyl ether  
MTBE = Methyl tert-butyl ether  
TAME = tert-Amyl methyl ether  
TBA = tert-Butyl alcohol  
µg/L = Micrograms per Liter

**FOOTNOTES:**

a = Calibration verification for ethanol is within method limits but outside contractual limits.

**NOTES:**

All volatile organic compounds analyzed using EPA Method 8260B.

Note: The data within this table collected prior to April 2006 was provided to Broadbent & Associates, Inc. by Atlantic Richfield Company and their previous consultants. Broadbent & Associates, Inc. has not verified the accuracy of this information.

Reno, NV 89502

Re: Groundwater Sampling Data Package, BP Service Station No. 11133, located at  
2220 98<sup>th</sup> Avenue, Oakland, California

### **General Information**

*Data Submittal Prepared / Reviewed by:* Sandy Hayes / Jay Johnson

*Phone Number:* (530) 676-6000

*On-Site Supplier Representative:* Hal Hansen and Roberto Heimlich

*Sampling Date:* January 15, 2008

*Arrival:* 08:30                   *Departure:* 16:00

*Weather Conditions:* Foggy

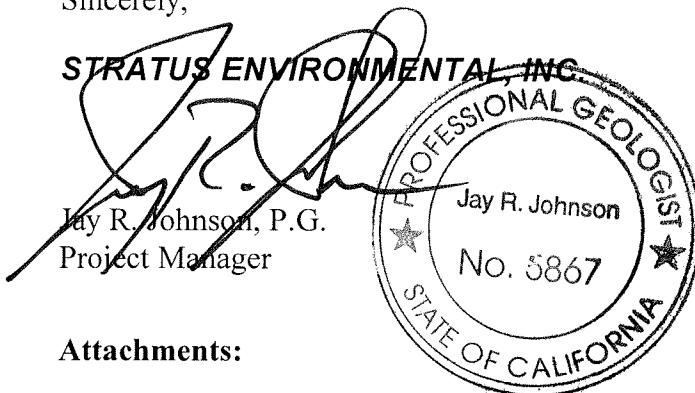

*Unusual Field Conditions:* None

*Scope of Work Performed:* Quarterly monitoring and sampling

*Variations from Work Scope:* Well AW-7 could not be located. Stratus will be surveying to locate before the next sampling event.

This submittal presents the tabulation of data collected in association with routine groundwater monitoring. The attachments include bill of lading, field data sheets, chain of custody documentation, and certified analytical results. The information is being provided to BP-ARCO's Scoping Supplier for use in preparing a report for regulatory submittal. This submittal is limited to presentation of collected data and does not include data interpretation or conclusions or recommendations. Any questions concerning this submittal should be addressed to the Preparer/Reviewer identified above.

Sincerely,

**Attachments:**

- Bill of Lading
- Field Data Sheets
- Chain of Custody Documentation
- Certified Analytical Results

RE: BP Heritage #11133, Oakland, CA  
Work Order: MRA0625

Enclosed are the results of analyses for samples received by the laboratory on 01/16/08 20:00. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Lisa Race  
Senior Project Manager

CA ELAP Certificate # 2682

The results in this laboratory report pertain only to the samples tested in the laboratory. The analyses contained in this report were performed in accordance with the BPGCLN Technical Specifications, applicable Federal, State, local regulations and certification requirements as well as the methodologies as described in laboratory SOPs reviewed by the BPGCLN. This entire report was reviewed and approved for release.

The carbon range for the TPH-GRO has been changed from C6-C10 to C4-C12. The carbon range for TPH-DRO has been changed from C10-C28 to C10-C36. EPA 8015B has been modified to better meet the requirements of California regulatory agencies.

These samples were received with no custody seals.

### Notes and Definitions

PV	Hydrocarbon result partly due to individ. peak(s) in quant. range
EY	Result exceeds normal dynamic range; reported as a min. est.
BV	Sample received after holding time expired
BU	Sample analyzed after holding time expired
BB	Sample > 4x spike concentration
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit or MDL, if MDL is specified
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
