Karel,
Once we found that there was contaminated soil, we stopped work on the gas SCADA project. On Monday, PSC Environmental will saw cut the sidewalk and street to expose the remainder of the soil within the gas SCADA project path, excavate the soil, consolidate the soil into 20 yard roll off bins, sample, profile, and properly dispose of the soil. Once that is completed, our gas construction crews will re-mobilize to complete the construction work.

Thank you,
Lavender Lee

Karel,

That is correct. I was informed by the local Environmental Field Specialist, Christina Ellsworth that PSC Environmental is currently scheduled to perform the remainder of the work to prepare for construction. This work is currently scheduled for June 9, 2014, at 7:30 a.m., pending PSC receiving their excavation permit.

Thank you,

Lavender Lee
