---

Dear Mr. Saberi,

We (Kit Soo and Dilan Roe) had a conference call today (October 12, 2016) with your consultant Mr. Bob Clark-Riddell of Pangae, Inc. I will be sending a more detailed email to provide a summary of our discussion and our agreed upon action items/deliverables.

For now and in order to expedite the groundwater sampling activity as discussed during our call, we would like to request that you perform groundwater sampling at all existing groundwater monitoring wells (include the AS wells since some of them have detections) at the site as soon as possible or at least before the rainy season begins. This activity will allow further assessment on the rebound conditions following system shut down at the site in February 2013. At the current time, there is only 1 set of groundwater monitoring data collected from May 2014 available for assessment since system shut down.

If you have any questions, please let me know.

Thanks, Kit

**Kit Soo, PG**
