Incident #97088250  
Cambria Project #244-0233-002

Alameda County  
OCT 18 2002  
Environmental Health

Dear Mr. Chan:

On behalf of Equilon Enterprises LLC dba Shell Oil Products US, Cambria Environmental Technology, Inc. (Cambria) is submitting this groundwater monitoring report in accordance with the reporting requirements of 23 CCR 2652d.

### THIRD QUARTER 2002 ACTIVITIES

**Groundwater Monitoring:** Blaine Tech Services, Inc. (Blaine) of San Jose, California gauged all site wells, measured dissolved oxygen (DO) concentrations, calculated groundwater elevations, and compiled the collected data. Cambria prepared an area vicinity map which includes previously submitted well survey information (Figure 1) and a groundwater elevation contour map (Figure 2). Blaine's report, with supporting field notes, is included as Attachment A.

**Groundwater Extraction (GWE):** As proposed in the May 23, 2002 *Subsurface Investigation Work Plan*, semi-monthly mobile GWE using MW-5 began on June 11, 2002 in an attempt to reduce hydrocarbon concentrations in groundwater in the suspected source area. Mass-removal data for the site is presented in Table 1. To date, approximately 0.72 pounds of hydrocarbons have been removed by GWE.

**Dual Phase Vapor Extraction (DVE):** Dual-phase vapor extraction (DVE) is the process of applying high vacuum through an airtight well seal to simultaneously extract soil vapors from the vadose zone and to enhance GWE from the saturated zone. Semi-monthly GWE was changed to

Fax (510) 420-9170

semi-monthly DVE beginning on September 19, 2002. Mass removal data is summarized in Table 2. To date, approximately 1.3 pounds of vapor phase hydrocarbons have been removed from the subsurface.

**July 2002 Door-to-Door Receptor Survey:** On July 23, 2002, Cambria conducted a door-to-door survey of the properties downgradient of the site to determine whether there are any active water wells or basements in the area downgradient of the site. Cambria received responses from 23 of the 36 properties included in the survey. Nine of the respondents reported that either a one-half or a full basement was present at their dwelling. Only one sump pump was reported. Results of the survey were tabulated and reported in Cambria's August 26, 2002 *Subsurface Investigation Report and Corrective Action Plan* (SI and CAP).

**Subsurface Investigation:** On July 23, 2002 Cambria advanced four offsite hand-auger borings to complete the work outlined in the May 23, 2002 *Subsurface Investigation Work Plan*. The onsite portion of the work, which included a total of nine onsite Geoprobe® borings, was completed on June 9 and 10, 2002. The purpose of the investigation was to further define the extent of impacted soil in the former underground storage tank area and to further characterize the extent of impacted groundwater downgradient of the site. During the investigation, no benzene was detected in any of the unsaturated soil samples. Total petroleum hydrocarbons as gasoline were detected at a concentration of 2.3 parts per million in one unsaturated soil sample. Groundwater results from the investigation indicate that the hydrocarbon plume in groundwater appears to be confined to within 10 feet to the west, 10 feet to the south, 15 feet to the east and 30 feet to the north of the tank pit area. Analytical results obtained from the saturated soil samples indicate that the hydrocarbon concentrations attenuate vertically to very low concentrations within 10 feet of the static groundwater level. Results of the investigation were reported in Cambria's SI and CAP dated August 26, 2002.

**SI and CAP:** In addition to the subsurface investigation results described above, Cambria's August 26, 2002 SI and CAP included an evaluation of remedial alternatives to reduce benzene concentrations in groundwater to levels considered protective of human health and the environment in the shortest time frame feasible. Cambria recommended in-situ oxidation using Fenton's Reagent/Hydrogen Peroxide. In an August 30, 2002 email, the Alameda County Health Care Services Agency (ACHCSA) identified a number of concerns regarding the SI and CAP. ACHCSA also indicated that the CAP for this site would go through a public participation process with a 30-day public review and comment period before approval.

**Subsurface Investigation Report and Corrective Action Plan Addendum:** Cambria responded to ACHCSA's concerns regarding the August 26, 2002 SI and CAP in a *Subsurface Investigation*

*Report and Corrective Action Plan – Addendum* dated September 12, 2002. To date, Cambria has not received a written response from ACHCSA.

## ANTICIPATED FOURTH QUARTER 2002 ACTIVITIES

**Groundwater Monitoring:** Blaine will gauge and sample all wells, measure DO concentrations, and tabulate the data. Groundwater samples are collected semi-annually in the second and fourth quarters. Cambria will prepare a monitoring report.

**Groundwater Extraction (DVE):** Semi-monthly DVE using MW-5 will continue through the fourth quarter of 2002.

**Corrective Action Implementation:** Cambria intends to schedule and conduct the 5-day in-situ field test of hydrogen peroxide/Fenton's reagent injection as soon as approval to proceed is given by ACHCSA.

								<b>0.08327</b>		
					<b>Total Gallons Removed:</b>			<b>0.11854</b>		
								<b>0.00141</b>		

**Abbreviations & Notes:**

TPPH = Total purgeable hydrocarbons as gasoline

ppb = Parts per billion

gal = Gallons

Mass removed based on the formula: volume extracted (gal) x concentration ( $\mu\text{g}/\text{L}$ ) x ( $\text{g}/10^6\mu\text{g}$ ) x (pound/453.6g) x (3.785 L/gal)

Volume removal data based on the formula: density (in gms/cc) x 9.339 (ccxlbs/gmsxgals)

TPPH and benzene analyzed by EPA Method 8260

Concentrations based on most recent groundwater monitoring results

If concentration is less than the laboratory detection limit, one half of the detection limit concentration is used in the mass removal calculation.

Groundwater extracted by vacuum trucks provided by Phillips Services. Water disposed of at a Martinez Refinery.

**Table 2: Vapor Extraction - Mass Removal Data - Former Shell Service Station, Incident #97088250, 1230 14th Street, Oakland, California**

Date	Well	ID	Interval Hours of Operation	System Flow Rate (CFM)	Hydrocarbon Concentrations			TPPH		Benzene	
					TPHg	Benzene	MTBE	TPHg Removal Rate (#/hour)	Cumulative TPHg Removed (#)	Benzene Removal Rate (#/hour)	Cumulative Benzene Removed (#)
					(Concentrations in ppmv)						
09/19/02	MW-5	4.00	10.1	150	25	<0.33	0.020	0.081	0.003	0.012	
10/01/02	MW-5	4.00	11.1	2,100	23	2.0	0.312	1.327	0.003	0.025	
<b>Total Pounds Removed:</b>								TPHg =	1.327	Benzene =	0.025

**Abbreviations and Notes:**

CFM = Cubic feet per minute

TPHg = Total petroleum hydrocarbons as gasoline (C6-C12) by modified EPA Method 8015 in 1 liter teflar bag samples

ppmv = Parts per million by volume

# = Pounds

NA = Not available

TPHG, Benzene, and MTBE analyzed by EPA Method 8015/8020 in 1 liter teflar bag samples

TPHg / Benzene / MTBE removal rate = Rate based on Bay Area Air Quality Management District's Manual of Procedures for Soil Vapor Extraction dated July 17, 1991.

(Rate = Concentration (ppmv) x system flow rate (cfm) x (1lb-mole/386ft<sup>3</sup>) x molecular weight (86 lb/lb-mole for TPHg, 78 lb/lb-mole for benzene, 88 lb/lb-mole for MTBE)  
 x 60 min/hour x 1/1,000,000)

Cumulative TPHg / Benzene / MTBE removal = Previous removal rate multiplied by the hour-interval of operation plus the previous total

If concentration is less than the laboratory detection limit, one half of the detection limit concentration is used in the mass removal calculation.

Third Quarter 2002 Groundwater Monitoring at  
Former Shell Service Station  
1230 14<sup>th</sup> Street  
Oakland, CA

Monitoring performed on July 18, 2002

---

#### Groundwater Monitoring Report 020718-AM-3

This report covers the routine monitoring of groundwater wells at this Former Shell facility. In accordance with standard procedures that conform to Regional Water Quality Control Board requirements, routine field data collection includes depth to water, total well depth, thickness of any separate immiscible layer, water column volume, calculated purge volume (if applicable), elapsed evacuation time (if applicable), total volume of water removed (if applicable), and standard water parameter instrument readings. Sample material is collected, contained, stored, and transported to the laboratory in conformance with EPA standards. Purgewater (if applicable) is, likewise, collected and transported to the Martinez Refining Company.

Basic field information is presented alongside analytical values excerpted from the laboratory report in the cumulative table of **WELL CONCENTRATIONS**. The full analytical report for the most recent samples and the field data sheets are attached to this report.

At a minimum, Blaine Tech Services, Inc. field personnel are certified on completion of a forty hour Hazardous Materials and Emergency Response training course per 29 CFR 1910.120. Field personnel are also enrolled in annual eight hour refresher courses.

Blaine Tech Services, Inc. conducts sampling and documentation assignments of this type as an independent third party. Our activities at this site consisted of objective data and sample collection only. No interpretation of analytical results, defining of hydrological conditions or formulation of recommendations was performed.

Please call if you have any questions.

Yours truly,

Leon Gearhart  
Project Coordinator

Well ID	Date	TPPH (ug/L)	B (ug/L)	T (ug/L)	E (ug/L)	X (ug/L)	MTBE 8020 (ug/L)	MTBE 8260 (ug/L)	TOC (MSL)	Depth to Water (ft.)	GW Elevation (MSL)	DO Reading (ppm)
---------	------	----------------	-------------	-------------	-------------	-------------	------------------------	------------------------	--------------	----------------------------	--------------------------	------------------------

**Abbreviations:**

TPPH = Total petroleum hydrocarbons as gasoline by EPA Method 8260B; prior to April 27, 2001, analyzed by EPA Method 8015.

BTEX = benzene, toluene, ethylbenzene, xylenes by EPA Method 8260B; prior to April 27, 2001, analyzed by EPA Method 8020.

MTBE = Methyl-tertiary-butyl ether

TOC = Top of Casing Elevation

GW = Groundwater

DO = Dissolved Oxygen

NA = Not applicable

ug/L = Parts per billion

ppm = Parts per million

MSL = Mean sea level

ft = Feet

< n = Below detection limit

D = Duplicate sample

n/n = Pre-purge/Post-purge DO Readings

**Notes:**

a = Sample was analyzed outside of the EPA recommended holding time.

Site surveyed November 1, 2001 by Virgil Chavez Land Surveying of Vallejo, California.

## WELL GAUGING DATA
