**Subject:** RE: Tesoro Livermore Deep Monitoring Well Work Plan

Mr. Nelson,

I have not reviewed your March 11 report and work plan. I expect to complete work on other cases with earlier submittals and then move to your case by the end of next week.

**Subject:** Tesoro Livermore Deep Monitoring Well Work Plan  
**Importance:** High

Mr. Wickham,

Arctos submitted a membrane interface probe (MIP) investigation results and work plan for deep monitoring well installation report to ACEH on March 11th. Based on the MIP investigation results, a deep monitoring well just downgradient of the USTs was proposed in the report and a work plan for the well was included. We are scheduled to install the deep monitoring well next week starting on April 12th, pending your approval. Could you please let me know if you have any issues with the proposed well installation. Thank you.
