Tesoro Project Meeting

Jeff Baker - Tesoro

Mike Purchase - ARCTOS

Matthew Nelson - ARCTOS

~~Mike~~

Dennis Conley Haley & Aldrich

RAP for Livermore site

- proposing sparging w/ SVE

~~will need extraction~~

- will need to get site access

- based on historic ~~low~~ low water levels
may move screen for sparge wells ~~to~~ 3' deeper

- high pressure, low volume injection

- 2" well in same borehole for monitoring

San Lorenzo site

- OK w/ discontinuing groundwater extraction
confirm by email

- Go to oxygen diffusion curtain using existing
vaults

San Leandro

- Adjacent to Dumas plume - DTSC site

- no VOCs on site but downgradient

- discussed factors that would go into ^{closure} decision

- groundwater concentrations low for benzene
but vapor concentration high in soil
