

Schultz, Robert, Env. Health

Subject: Bill Hurtado, RO-439
Entry Type: Phone call
Company: Motel 6
Start: Wed 8/25/2004 4:07 PM
End: Wed 8/25/2004 4:07 PM
Duration: 0 hours

Bill is from Motel 6 Pleasanton adjacent to Chevron Pleasanton, 9-0917
GW Monitoring and Sampling ongoing, has questions about results
972-360-2716

Returned call on 9/2/04
monitoring on 6/14/04 detected 700 ppb TPHg in mw-6, up from non-detect
Bill is concerned about spike on last quarter's monitoring data, well MW-6 is near motel 6, according to Bill, the contours may suggest impact to motel 6 property, and accumulation of product near motel 6
he believes that there needs to be one more well: northerly/easterly corner of property

Bill has spoken with deena harding who told him to call barney chan. I told bill that I will include this concern in my review and he will be notified via future letters to Chevron. Also, I will look into getting a phone number for Karen Streich.
bhurtado@accor-na.com

I will look into issue as part of my review (he is currently on the cc-list) and I will look into getting a phone number for him to contact Karen Streich.
