Subject: RO440, Emery Bay Plaza
Entry Type: Phone call
Company: PES Environmental

Start: Wed 9/30/2009 3:30 PM
End: Wed 9/30/2009 3:35 PM
Duration: 5 minutes

Had a call from PES Environmental. They were retained by TMG to prepare a work plan. He called to discuss what components should be included in the work plan in specific, he felt that since the new building was built with a passive vapor barrier for the methane, that vapor intrusion is unlikely to be a problem. I requested that he place that information in the work plan and that the new caseworker will review that along with the work plan.

I asked if the site has been claimed. He said they had the paperwork and will be submitting it shortly.
