**RE: WORK PLAN FOR
ENVIRONMENTAL ENGINEERING
SERVICES
EMERYVILLE POSTAL FACILITY
EMERYVILLE, CALIFORNIA**

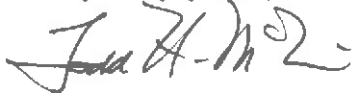

Dear Ms. Hugo:

As requested, attached is a site plan to be added to our work plan, originally issued May 26, 1994, for the United States Postal Facility located at 1505 62nd Street in Emeryville, California. The site plan shows the referenced site relative to the adjacent Market Place property and existing monitoring wells on both properties.

As you know, a quarterly ground water sampling program will be implemented at the site which will include sampling of the five on-site wells in addition to off-site wells W-8, W-4, W-23, W-13, and W-14. In addition, a hydropunch boring will be drilled in the Pacific Rail Road right of way between the subject site and the Market Place property, as discussed in our work plan.

Your timely review of the attached information would be very much appreciated, as we would like to schedule our field work as soon as possible. If you have any questions or need additional information, please call.

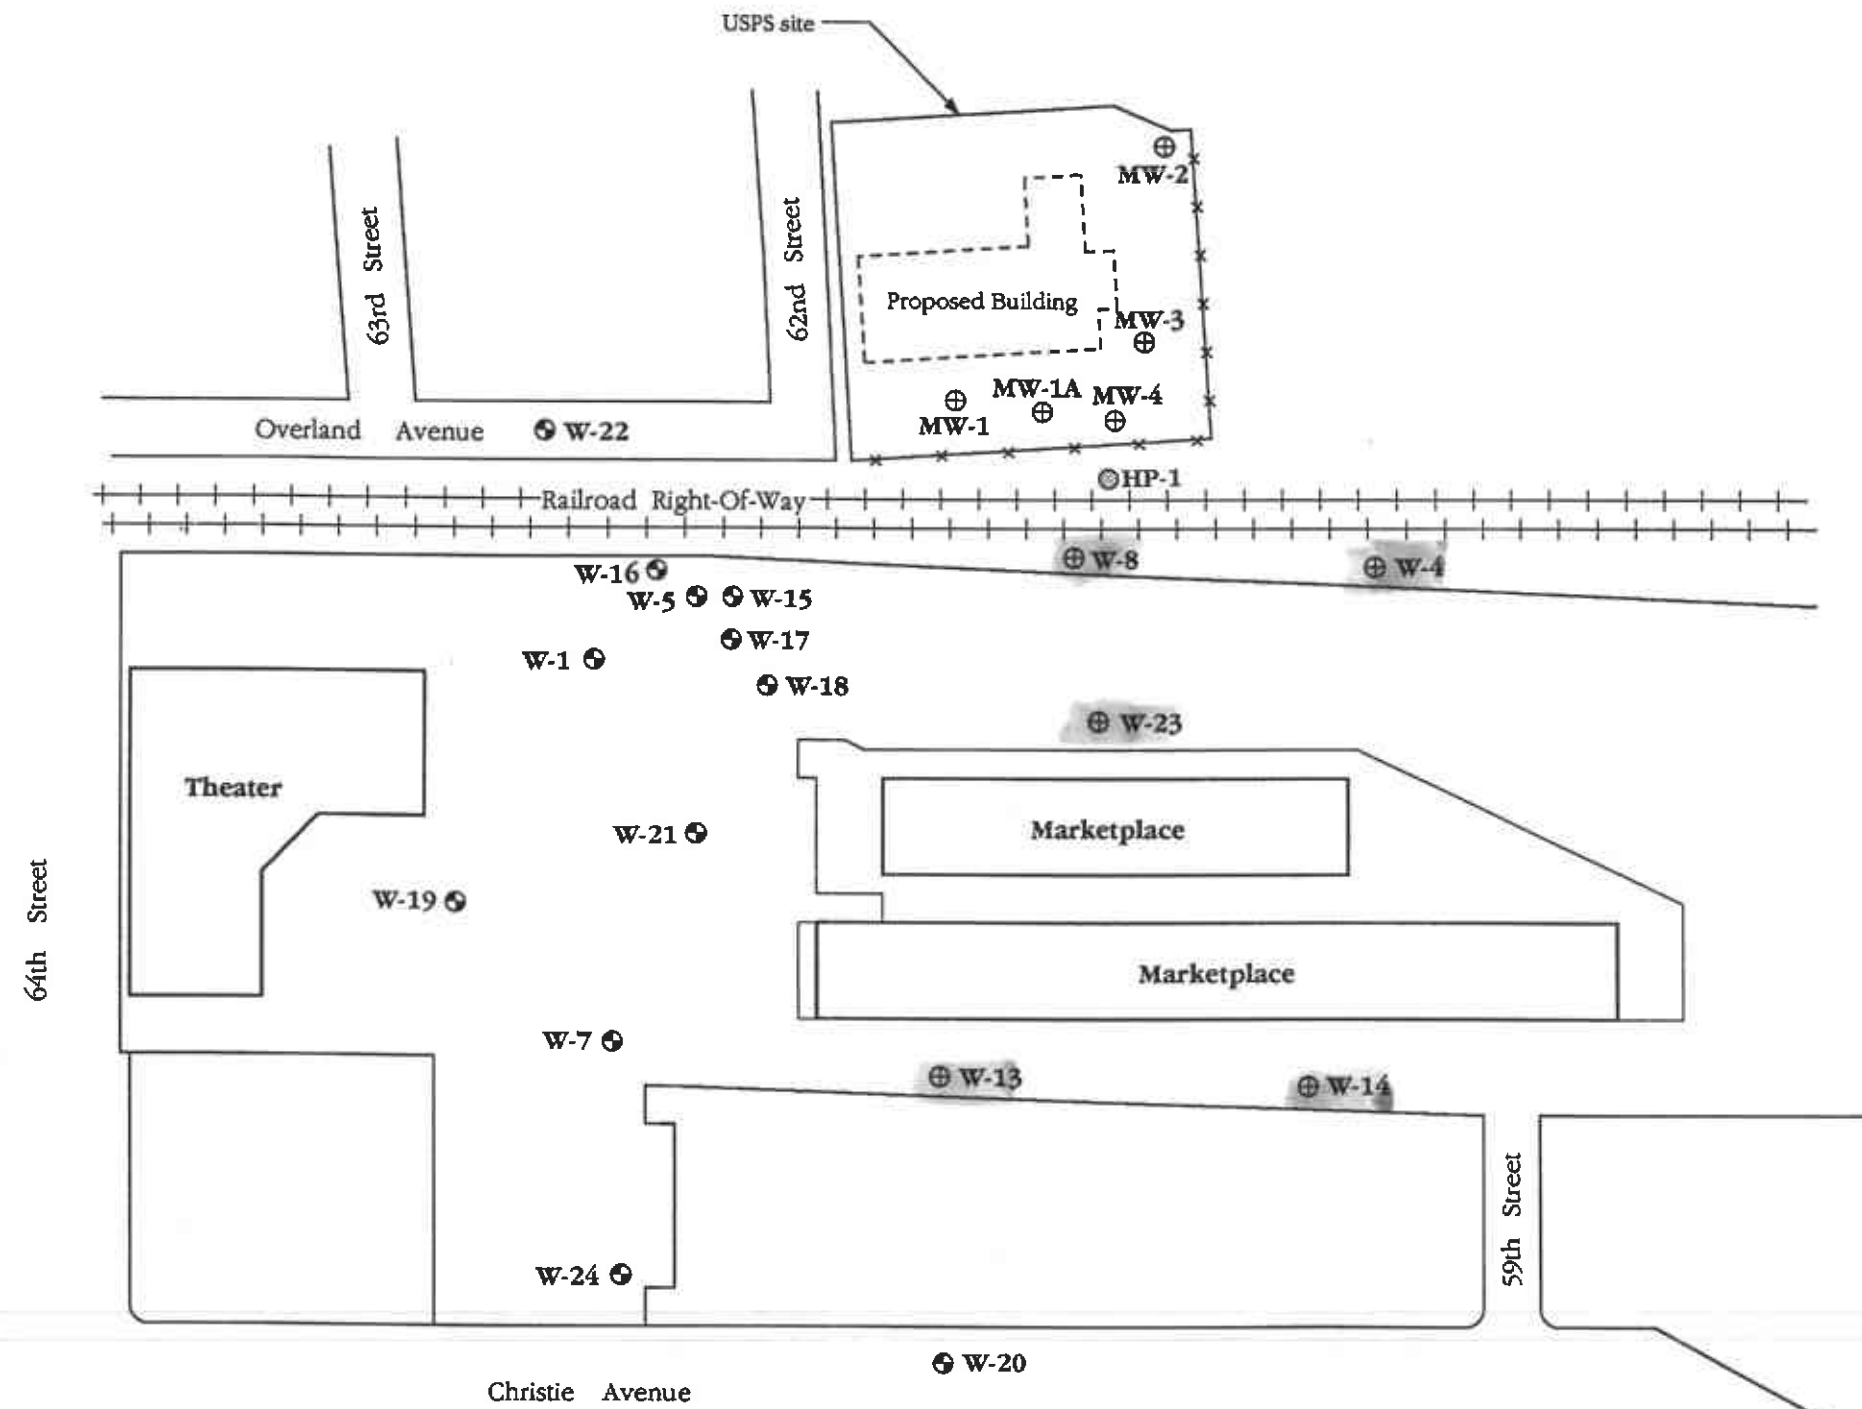

Very truly yours,

Todd H. McNair
Environmental Scientist
