Fuad Ateyeh calls from the Alameda Valero asking for a closure letter because he is trying to sell the property. I inform him that the site consultants will be sampling the site in early February and should have a report out in a couple of months and that the closure process will take another 6 months at least. I get his contact information and tell him to feel free to call me about the report when it comes in. I also explain that if he has an agreement for purchase he can send it to me with the purchase prices redacted so this site can be placed on a priority. But he explain to me that the buyers are asking for the closure letter before they enter an agreement.
