Kathy,

Thank you for the update. With the MTBE plume delineated, the case now appears to satisfy the closure criteria, though CPT-6 shows an increase in TPH, which may be attributed to Chevron 9-0290. I'll put it on the calendar for our internal closure review.

Regards,
Keith Nowell

Subject: RO450 CSM/LTC uploaded to ACEH FTP site

Please find uploaded the CSM/LTC for the above referenced site. We will email over separately the case closure summary and distribution list.

Please let me know if you have any questions.

Kathy
