**ENVIRONMENTAL RESOLUTIONS, INC.**

September 15, 1998  
ERI 224832.R01

Ms. Tina Berry  
Tosco Marketing Company  
2000 Crow Canyon Place, Suite 400  
San Ramon, California 94583

Subject:           Underground Storage Tank, Associated Piping, and Dispenser Removal at Former  
                  Tosco 76 Service Station 0843, 1629 Webster Street, Alameda, California.

Ms. Berry:

At the request of Tosco Marketing Company (Tosco), Environmental Resolutions, Inc. (ERI) performed an environmental investigation at the subject site in conjunction with the removal of one used-oil underground storage tank (UST), two gasoline USTs, associated piping, and dispensers. Tosco requested ERI to conduct the investigation to evaluate soil conditions beneath the site.

## **BACKGROUND**

The site is on the southwestern corner of Webster Street and Pacific Avenue in Alameda, California, as shown on the Site Vicinity Map (Plate 1). The locations of former USTs, dispenser islands, and other selected site features are shown on the Generalized Site Plan (Plate 2). Properties in the vicinity of the site are occupied by commercial and residential developments.

## **FIELD WORK**

ERI performed field work at the site on June 17, 1998, in accordance with ERI's Field Procedures (Attachment A) and Site Safety Plan. Field work and soil sampling are discussed below.

### Removal of Gasoline USTs

On ~~June 17~~, 1998, ERI's representative observed John's Excavation (JE) of Santa Rosa, California remove two 10,000-gallon single-wall steel gasoline USTs. Ms. Eva Chu of Alameda County Department of Environmental Health Services (ACDEHS) and Mr. Steve McKinley of the City of Alameda Fire Department (CAFD) observed the UST removal. Groundwater was observed at approximately 8.5 feet below ground surface (ft bgs) in the UST cavity. Inspection of each tank upon removal revealed that the USTs exhibited some pitting, but were intact and had no visible holes or cracks. Trident Truckline (Trident) of Hayward, California, transported the tanks to Ecology Control Industries (ECI) Richmond, California facility for recycling.

Under the direction of Ms. Chu of ACDEHS, ERI's representative collected five samples of native soil from the north, south, and east sidewalls of the UST cavity at approximately 2 to 8 ft bgs. ERI's representative also collected a sample of groundwater from the UST cavity. Soil sample locations are shown on Plate 2.

#### Removal of Used-Oil UST

On June 17, 1998, ERI's representative observed JE remove the one 550-gallon single-wall steel used-oil UST. Ms. Chu of ACDEHS and Mr. McKinley of CAFD observed UST removal. Inspection of the tank upon removal revealed two holes measuring approximately  $\frac{3}{4}$ " in diameter near the fill port and deep pitting on the center bottom portion of the UST. Trident transported the tank to the ECI Richmond, California facility for recycling.

Under the direction of Ms. Chu, ERI's representative collected one sample of native soil from approximately 6 ft bgs from the north sidewall of the used-oil UST cavity. The soil sample location is shown on Plate 2.

#### Removal of Product Lines and Dispensers

JE removed product piping and dispensers prior to arrival of an ERI or ACDEHS representative on-site. Product lines consisted of 2-inch diameter single-wall fiberglass pipe. ERI's representative collected native soil samples from beneath each dispenser (D1 through D4) and beneath former product lines at angled connections and at 20 foot intervals at approximately 3 to 3.5 ft bgs. Soil sample locations are shown on Plate 2.

### LABORATORY ANALYSES AND RESULTS

ERI submitted soil samples to Columbia Analytical Services (CAS [California Certification #1426]) of San Jose, California for analysis. The laboratory analyses, methods of testing, and analytical results are summarized in Table 1. Copies of the Chain of Custody Records and laboratory reports are included in Attachment B.

#### Gasoline UST Soil Samples

Residual total purgeable petroleum hydrocarbons as gasoline (TPPHg) and methyl tertiary butyl ether (MTBE) were not detected at or above laboratory method detection limits in soil samples collected from the sidewalls of the gasoline UST cavity except for 44 parts per million (ppm) TPPHg and 260 ppm MTBE detected in the sample collected from the sidewall on the north side of tank T1 at 8 ft bgs. Total lead was also detected in samples collected from the sidewall on the north side of tank T1 ranging from 27 ppm to 63 ppm.

### Used-Oil UST Soil Sample

Residual hydrocarbons were not detected at or above the laboratory method detection limits in the native soil sample collected from the used-oil UST cavity. Total lead was detected in the used-oil UST cavity sample at 21 ppm.

### Dispenser and Product Line Soil Samples

TPPHg and MTBE were not detected at or above laboratory method detection limits in soil samples collected beneath product lines and dispensers.

### UST Cavity Groundwater Sample

Dissolved TPPHg, MTBE, and benzene were detected in the groundwater sample collected from the UST cavity at 19,000 parts per billion (ppb), 1,300 ppb, and 880 ppb, respectively.

## **SAMPLING AND DISPOSAL OF SOIL**

JE excavated approximately 338 tons of soil and backfill from the UST cavity and product line trenches during UST removal. ERI's representative collected three composite soil samples (four brass sleeves) from the stockpile for laboratory analyses. Results of laboratory analyses are shown in Table 1.

At Tosco's request, Manley Trucking of Sacramento, California transported and disposed of the stockpiled soil at Forward Landfill in Manteca, California. The disposal documentation is attached (Attachment C).

## **FORMER TANK CAVITY CONDUCTOR CASING INSTALLATION**

Upon authorization from Alameda County Public Works Agency (ACPWA), Tosco installed a conductor casing within the former UST cavity backfill. The ACPWA conductor casing "well" installation permit is provided in Attachment D. The purpose of this conductor casing is to accommodate possible periodic groundwater sampling and/or groundwater extraction. The approximate location of the conductor casing is shown on Plate 2.

## **LIMITATIONS**

This report was prepared in accordance with generally accepted standards of environmental practice in California at the time this investigation was performed. This investigation was conducted solely for the purpose of evaluating environmental conditions of the soil with respect to hydrocarbons. No soil engineering or geotechnical references are implied or should be inferred. Evaluation of the geologic conditions at the site for the purpose of this investigation is made from a limited number of observation points. Subsurface conditions may vary away from the data points available.

ERI recommends copies of this report be forwarded to:

Ms. Eva Chu

**FIELD PROCEDURES**

## FIELD PROCEDURES

### Safety Plan

This plan describes the basic safety requirements for the subsurface environmental investigation related to monitoring the removal of underground storage tanks and excavation of soil at the site. The Site Safety Plan is applicable to personnel of ERI and to subcontractors of ERI. Personnel scheduled to work at the site were briefed on the contents of the Site Safety Plan before work began. A copy of the Site Safety Plan was kept at the work site and was available for reference by appropriate parties during work at the site. The geologist from ERI was the Site Safety Officer on site.

### Sampling Under Former Dispensers, Product Lines, and Underground Storage Tanks

Soil samples were collected by driving a hand-operated percussion sampler fitted with a clean brass sleeve into the soil. The sleeve was removed from the sampler and sealed promptly with Teflon tape and plastic caps.

A photoionization detector (PID) was used to evaluate the presence of hydrocarbon vapors in soil samples. Field instruments such as the PID are useful for indicating relative levels of hydrocarbon vapors, but do not detect the concentration of hydrocarbons present with the same precision as laboratory analyses.

### Sampling of Stockpiled Soil

These samples were collected and analyzed to characterize the soil for disposal. A PID was used to assist in selecting samples representative of the stockpile. Each of these soil samples was collected by driving a hand-operated percussion soil-sampling device lined with a clean brass sleeve into the soil after approximately 1 foot of soil was removed from the stockpile. Each sample sleeve was removed from the sampler and promptly sealed with Teflon tape and plastic caps. The sample was then labeled and placed in iced storage. Four samples were collected for approximately every 100 cubic yards of stockpiled soil; each group of four samples was composited into one soil sample by the analytical laboratory.

### Sample Labeling and Handling

The soil samples selected for possible laboratory analysis were removed from the sampler and quickly sealed in their brass sleeves with Teflon tape and plastic caps. The respective sample containers were labeled in the field with the job number, sample location and depth, and date, and promptly placed in iced storage for transport to the laboratory. Chain of Custody Records were initiated in the field by the geologist and accompanied the samples to a laboratory certified by the State of California to perform the analyses requested.

Service Request No.: S9801605

Mr. Glenn Matteucci  
Environmental Resolutions, Inc.  
74 Digital Drive  
Suite 6  
Novato, CA 94949

RE: 0843 Alameda/224832T1

Dear Mr. Matteucci:

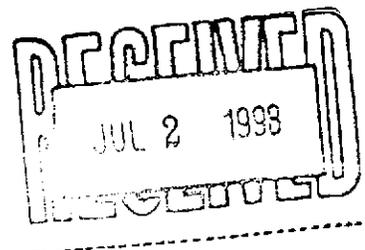

The following pages contain analytical results for sample(s) received by the laboratory on June 19, 1998. Results of sample analyses are followed by Appendix A which contains sample custody documentation and quality assurance deliverables requested for this project. The work requested has been assigned the Service Request No. listed above. To help expedite our service, please refer to this number when contacting the laboratory.

Analytical results were produced by procedures consistent with Columbia Analytical Services' (CAS) Quality Assurance Manual (with any deviations noted). Signature of this CAS Analytical Report below confirms that pages 2 through 21, following, have been thoroughly reviewed and approved for release in accord with CAS Standard Operating Procedure ADM-DatRev3.

Please feel welcome to contact me should you have questions or further needs.

Sincerely,

Bernadette T. Cox  
Project Chemist

Service Request No.: S9801606

Mr. Glenn Matteucci  
ENVIRONMENTAL RESOLUTIONS, INC.  
74 Digital Dr.  
Suite 6  
Novato, CA 94949

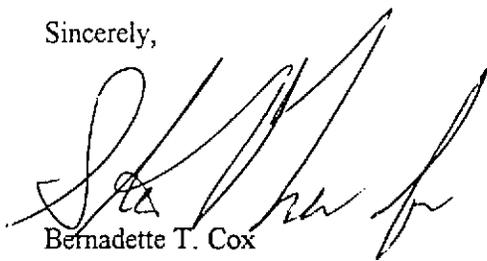

Dear Mr. Matteucci:

The following pages contain analytical results for sample(s) received by the laboratory on June 18, 1998. Results of sample analyses are followed by Appendix A which contains sample custody documentation and quality assurance deliverables requested for this project. The work requested has been assigned the Service Request No. listed above. To help expedite our service, please refer to this number when contacting the laboratory.

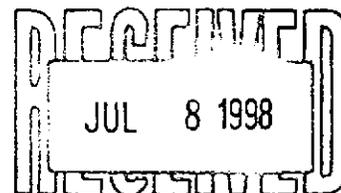

Analytical results were produced by procedures consistent with Columbia Analytical Services' (CAS) Quality Assurance Manual (with any deviations noted). Signature of this CAS Analytical Report below confirms that pages 2 through 44, following, have been thoroughly reviewed and approved for release in accord with CAS Standard Operating Procedure ADM-DatRev3.

Please feel welcome to contact me should you have questions or further needs.

Sincerely,

Bernadette T. Cox  
Project Chemist

Mr. Glenn Matteucci  
Environmental Resolutions, Inc.  
74 Digital Drive  
Suite 6  
Novato, CA 94949

RE: 0843 Alameda/224832T1

Dear Mr. Matteucci:

Enclosed is the revised analytical report for samples received by the laboratory on June 19, 1998. Per my conversation with Ms. Sue Shallenberger on July 1, I have included the Lead results for the "SP-1 and SP-2" stockpiles, that were not in the original report, on page 15. I am sorry for the inconvenience this has caused you.

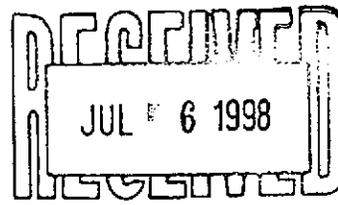

Please replace the original report with the enclosed.

Feel free to call me if you have anymore concerns.

Sincerely,

A handwritten signature in cursive script that reads "Bernadette T. Cox". The signature is written in dark ink and is positioned above the typed name.

Bernadette T. Cox  
Project Chemist

Service Request No.: S9801605

Mr. Glenn Matteucci  
Environmental Resolutions, Inc.  
74 Digital Drive  
Suite 6  
Novato, CA 94949

RE: 0843 Alameda/224832T1

Dear Mr. Matteucci:

The following pages contain analytical results for sample(s) received by the laboratory on June 19, 1998. Results of sample analyses are followed by Appendix A which contains sample custody documentation and quality assurance deliverables requested for this project. The work requested has been assigned the Service Request No. listed above. To help expedite our service, please refer to this number when contacting the laboratory.

Analytical results were produced by procedures consistent with Columbia Analytical Services' (CAS) Quality Assurance Manual (with any deviations noted). Signature of this CAS Analytical Report below confirms that pages 2 through 22, following, have been thoroughly reviewed and approved for release in accord with CAS Standard Operating Procedure ADM-DatRev3.

Please feel welcome to contact me should you have questions or further needs.

Sincerely,

A handwritten signature in cursive script that reads "Bernadette T. Cox". The signature is written in dark ink and is positioned above the typed name.

Bernadette T. Cox  
Project Chemist

Service Request No.: S9801898

Mr. Glenn Matteucci  
Environmental Resolutions, Inc.  
74 Digital Drive  
Suite 6  
Novato, CA. 94949

RE: 224832T1

Dear Mr. Matteucci:

The following pages contain analytical results for sample(s) received by the laboratory on June 18, 1998. Results of sample analyses are followed by Appendix A which contains sample custody documentation and quality assurance deliverables requested for this project. The work requested has been assigned the Service Request No. listed above. To help expedite our service, please refer to this number when contacting the laboratory.

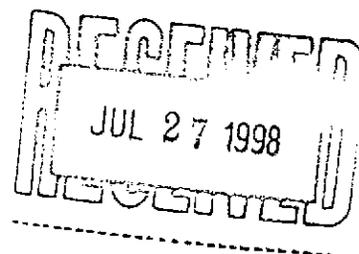

Analytical results were produced by procedures consistent with Columbia Analytical Services' (CAS) Quality Assurance Manual (with any deviations noted). Signature of this CAS Analytical Report below confirms that pages 2 through 5, following, have been thoroughly reviewed and approved for release in accord with CAS Standard Operating Procedure ADM-DatRev3.

Please feel welcome to contact me should you have questions or further needs.

Sincerely,

A handwritten signature in cursive script that reads "Bernadette T. Cox".

Bernadette T. Cox  
Project Chemist

RE: 843 ALAMEDA/224832T1

Dear Mr. Matteucci:

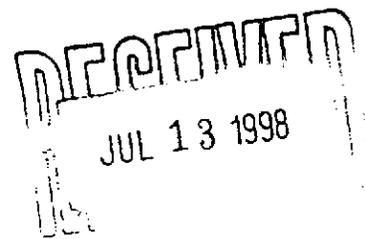

The following pages contain analytical results for sample(s) received by the laboratory on June 18, 1998. Results of sample analyses are followed by Appendix A which contains sample custody documentation and quality assurance deliverables requested for this project. The work requested has been assigned the Service Request No. listed above. To help expedite our service, please refer to this number when contacting the laboratory.

Analytical results were produced by procedures consistent with Columbia Analytical Services' (CAS) Quality Assurance Manual (with any deviations noted). Signature of this CAS Analytical Report below confirms that pages 2 through 6, following, have been thoroughly reviewed and approved for release in accord with CAS Standard Operating Procedure ADM-DatRev3.

Please feel welcome to contact me should you have questions or further needs.

Sincerely,

Steven L. Green  
Project Chemist

Re: Approval No. 713422  
Contaminated Soil w/Gasoline  
Fmr. Tosco (Union 76) #0843, 1629 Webster Street, Alameda

Dear Mr. Matteucci:

**FORWARD INC.** is pleased to inform you that the approximately 500 tons of Contaminated Soil w/Gasoline from the referenced site has been approved for acceptance at our Manteca, California Landfill as a Class 2 waste. This approval has been based on the information provided in the waste profile and associated materials submitted on behalf of Tosco Marketing Company (Generator). Acceptance of the waste is subject to regulatory requirements, and is also subject to the "Terms and Conditions" agreed to and signed by Generator in the waste profile.

Your approval number for this project will be 713422. This number should be used in all scheduling and correspondence with **FORWARD, INC.** regarding this waste profile.

This profile shall remain in effect until December 31, 1998, or until any significant changes in the waste stream occur. At that time, **FORWARD, INC.** will re-evaluate the profile, and current analytical data and requirements will be reviewed.

Please schedule all waste shipments with the Landfill (209-982-4298) at least 24 hours in advance. The landfills hours of operation are Monday through Friday 6:00 am to 4:30 pm for soil, 6:00 am to 3:00 pm for all other waste types.

Thank you for the opportunity to be of service. Should you have any questions, please do not hesitate to contact me or our Customer Service at (800) 204-4242.

Sincerely,

**FORWARD, INC.**
