RE: 2528 ADELINE STREET, OAKLAND CA 94607

Dear Ms. Howkins,

This office recently completed a review of the case file for the above referenced Oakland site up to and including the February 5, 1996 letter from Carlo C. Mormorunni of Fitzgerald, Abbott & Beardsley (F, A & B).

In the October 27, 1995, F, A & B report, laboratory analysis of soil and groundwater samples collected from the three (3) on-site monitoring wells (MW1, MW2 and MW3) have detected elevated levels of total petroleum hydrocarbons as gasoline, kerosene and stoddard solvent (TPHg, TPHk and TPHss), oil and grease (O&G), benzene, toluene, ethyl benzene and total xylenes (BTEX). Additional contaminants detected in the soil and groundwater samples collected include barium, selenium, 1,1-dichloroethene (1,1-DCE), 1,1-dichloroethane (1,1-DCA) and 1,1,1-trichloroethane (1,1,1-TCA).

At this time please adhere to a **quarterly** schedule of well sampling, monitoring, and report submittal as referenced in Title 23, California Code of Regulations (CCR) section 2652(d). Please have these groundwater samples analyzed for total petroleum hydrocarbons as gasoline, kerosene and stoddard solvent (TPHg, TPHk and TPHss), the aromatic hydrocarbons benzene, toluene, ethyl benzene and total xylene isomers (BTEX), oil and grease (O&G), the heavy metals barium and selenium and volatile organic compounds (VOCs) as per EPA Method 8240. In addition, please have the groundwater samples filtered before performing metals analyses.

Please feel free to contact me directly at (510)567-6880 if you have any questions regarding the content of this letter.

Sincerely,

Dale Klettke, CHMM
Hazardous Materials Specialist

TVH = Total volatile hydrocarbons reported as gasoline, however the sample chromatogram does not resemble the gasoline standard.

TEH = Total extractable hydrocarbons reported as diesel, however the sample chromatogram does not resemble the diesel standard.

O&G = Oil and Grease

-- = Test not requested

Ba = Barium

Samples were collected on March 31, or August 9, 1995

mg/kg = milligrams per kilogram

ug/kg = micrograms per kilogram

<1.0 = None detected at or above the stated detection limit
