Subject: RE: Chevron 91851 (RO464) Well Destruction Question Followup

Alexis,

As you are aware, the public comment period for the subject site ended on Friday August 1, 2014. I have had a chance to review my emails and phone messages that I received while on vacation, and no written or verbal comments were received by Alameda County Environmental Health (ACEH). Therefore, Chevron is free to proceed with the destruction of all wells associated with the site (groundwater, vapor, etc), as requested in the May 27, 2014 letter from ACEH. The timelines established in that letter should be adequate to complete the tasks; however, if additional time is required, please let me know.

Thanks,

Mark Detterman

Subject: Chevron 91851 (RO464) Well Destruction Question Followup

Alexis,

I wanted to followup on our conversation of a few minutes ago in regards to the end of the public comment period and of well destruction. The end of the comment period was Friday 8/1. I have not had a chance to check all of my messages (email and phone) to see if I received any comments. Please give me a day or two bit to do that. That shouldn't delay you excessively, but should you need additional time to complete well destruction (currently October 3) and submit a well destruction report (currently December 1), the deliverable dates can be extended.
