Mark,

The May 30, 2014 would be for the well destruction report submittal. The only outstanding items that may pose an issue are the final waste manifests and the concern that was discussed with regards to attaining encroachment permits for Facility 90329.

Although, I will continue to keep you informed with regards to any updates as to potential issues.

Any questions, please let me know.

Thank you,

Alexis N. Fischer

Alexis,

Thanks for the email. I've a question in regards to well destruction at this site and 90329. The May 30 date, is that the date of well destruction, or of report submittal for the destructions? My concern is that well destruction on May 30th may not allow us to get the sites closed by June 30th.

Thanks,

Mark Detterman

Mark,

Per our conversation this afternoon as to a specific timeframe for the required work, I wanted to confirm the approved deadline of May 30, 2014 for well destructions for Facility 96991.

Thank you for your continued support with regards to these sites.

Any questions, please let me know.

Thank you,

Alexis N. Fischer

Mark,

I just wanted to give you an update on the well destruction activities for 92506 and 93864 and 96991. I accepted the Well destruction report for 93864 today and the report will be submitted to you by Nate Allen. The wells have been destroyed for 92506 and I am waiting on a well destruction report from Nate Allen so that I can review and accept it. CRA has a budget in place to destroy the wells at 96991 and I am waiting on them to prepare and submit a HASP for my review and acceptance.

Regards,

Brian A. Waite, P.G.

Brain and Alexis,

As we discussed in the March 13th meeting, I am sending a summary of tasks and due dates for each site that were identified. I appreciate Alexis providing a starting place as it shortened my time on this particular task. The summary for the case managed by Karel Detterman is also included.

I also have identified three additional sites of Brian's that we did not discuss; namely three sites pending well destruction for which we have not received a well destruction report. In a sense the sites are similar to RO269 / 90329 as well destruction is overdue. I include these three at the top of the list, with a bit of background. Similar to RO269 / 90329 we provide about week to provide a status by email.

Sites Not Discussed:

- RO146 – 92506 –
 - Well destruction requested in letter dated 8.1.2013; destruction requested by 9.30.2013
 - Extension granted 9.17.2013 to 11.15.2013
 - CVX to provide well destruction status in email by 3.28.2014
 - ACEH to issue Notice to Comply if not destroyed

- RO351 – 93864 –
 - Well destruction requested in letter dated 7.26.2013; destruction requested by 9.26.2013
 - Extension granted 9.17.2013 to 11.15.2013
 - CVX to provide well destruction status in email by 3.28.2014
 - ACEH to issue Notice to Comply if not destroyed

- RO475 – 96991 –
 - Well destruction requested in letter dated 7.26.2013; destruction requested by 9.26.2013
 - Extension granted 9.17.2013 to 11.15.2013
 - CVX to provide well destruction status in email by 3.28.2014
 - ACEH to issue Notice to Comply if not destroyed
