QUARTERLY SUMMARY REPORT
Third Quarter 1999
(July - September)

TOSCO 76 SERVICE STATION 7176

7850 Amador Valley Boulevard
Dublin, California

City/County ID: City of Dublin/Alameda County

Lead Agency: Alameda County Health Care Services Agency

BACKGROUND

Unocal Corporation (Unocal) replaced the fuel underground storage tanks (USTs) and removed the used-oil UST. The majority of hydrocarbon-impacted soil (1,863 tons) was excavated and transported to a Unocal-approved landfill. In July 1995, Unocal performed a soil and groundwater investigation that included drilling nine soil borings and constructing three on-site groundwater monitoring wells. During March 1998, Tosco Marketing Company (Tosco) performed an off-site soil and groundwater investigation that included installation of two off-site groundwater monitoring wells south and east of the site. Dissolved hydrocarbons have not been delineated east and south of the site.

RECENT QUARTER ACTIVITIES

Performed third quarter 1999 groundwater monitoring, sampling, and reporting.

NEXT QUARTER ACTIVITIES

Perform fourth quarter 1999 groundwater monitoring, sampling and reporting. Submit *Request and Work Plan for Case Closure* to the appropriate regulatory agencies.

CHARACTERIZATION/REMEDIAL STATUS

Soil contamination delineated?	<u>Yes</u>
Dissolved groundwater delineated?	<u>No</u>
Free Product delineated?	<u>NA</u>
Amount of gw contaminant recovered this quarter?	<u>0 gallons</u>
Amount of gw contaminant recovered to date?	<u>15,511 gallons/groundwater</u>
Soil remediation in progress?	<u>No</u>
Dissolved/free product remediation in progress?	<u>No</u>

RE: Tosco (UNOCAL) Service Station # 7176 located at 7850 Amador
Valley Blvd., Dublin, CA

Dear Mr. De Witt:

This office is in receipt of the Third Quarter Groundwater Monitoring and Sampling Report submitted by Deanna L. Harding of Gettler-Ryan Inc. Again the concentrations of all the constituents in the plume are generally decreasing with few exceptions and or fluctuations among some constituents.

U-1, U-2, and then MW-4 wells respectively are the wells with the highest concentrations of constituents within the plume. According to this report U-1 well revealed 3600ppb, 10,000ppb, 45ppb, 260ppb of TPH (D), TPH (G), Benzene, and MTBE respectively, while U-2 well indicated 440ppb, 1500ppb, 7.6ppb, and ND for the same constituents respectively. U-4 well, however, revealed less concentration of the contaminants than the above two wells at 310ppb, 700ppb, 2.1ppb, and ND for the same constituents respectively.

I will be looking forward for the 4th quarterly groundwater report.

Should you have any questions, please call me at (510)- 567-6876.

Sincerely,

Amir K. Gholami, REHS
Hazardous Materials Specialist
