Mr. Mo Mashoon Mash Petroleum 1721 Jefferson Street Oakland, California 94612

SUBJECT

Notification of Scheduled Environmental Activities

Former Exxon Service Station 7-3006 720 High Street, Oakland, California

Mr. Mashoon:

At the request of ExxonMobil Oil Corporation (ExxonMobil), Environmental Resolutions, Inc. (ERI) is notifying you of upcoming environmental activities at the subject site. As part of the ongoing environmental investigation at the subject site, ERI is advancing two off-site direct-push soil borings (DP7 and DP8), and six off-site cone penetrometer test (CPT) borings (CPT7 through CPT12). The proposed boring locations are shown on the attached Generalized Site Plan. Work is being performed at the direction of the Alameda County Health Care Services Agency Department of Environmental Health. This work is anticipated to occur December 8 through December 15, 2006. A project orientation meeting and subsurface clearance activities are scheduled for November 14, 2006, at 7:00am.

Soil cuttings and rinsate water from drilling activities will be placed in 55-gallon drums and stored at the site pending characterization and disposal. Upon receipt of laboratory analytical results of soil samples from the drums, ERI will coordinate with Exxon Mobil for disposal of the soil and water. ERI appreciates your cooperation to ensure that field work occurs safely and efficiently, and will minimize disruptions to station operations.

Please call Ms. Paula Sime, ERI's project manager for this site, at (707) 766-2000 with any questions regarding the work.

Sincerely, Environmental Resolutions, Inc.

Paula Sime Project Manager
