Spoke with Tom Venus regarding loose well covers at RO489 (18501 Hesperian Blvd., San Lorenzo). Tom stated that Matt Herrick is the project manager for the site. Tom stated that he was having difficulties in site access for RO494 and that the DPE system has reached asymptotic levels. Off-site property owner refuses access for well installation. Based on the review of the site, the off-site location is down to cross gradient and the monitoring point would aid in plume delineation and evaluate plume stability off-site. Tom will send ACEH documentation that Broadbent contacted the off-site property owner and that the property owner refused access to Broadbent. ACEH will send the off-site property owner a correspondence informing the RP of possible ramifications of his decision to deny access. I also asked Tom to submit an email to ACEH with a request to shut down DPE system is it has been demonstrated that the system has reached asymptotic levels.
