if checked

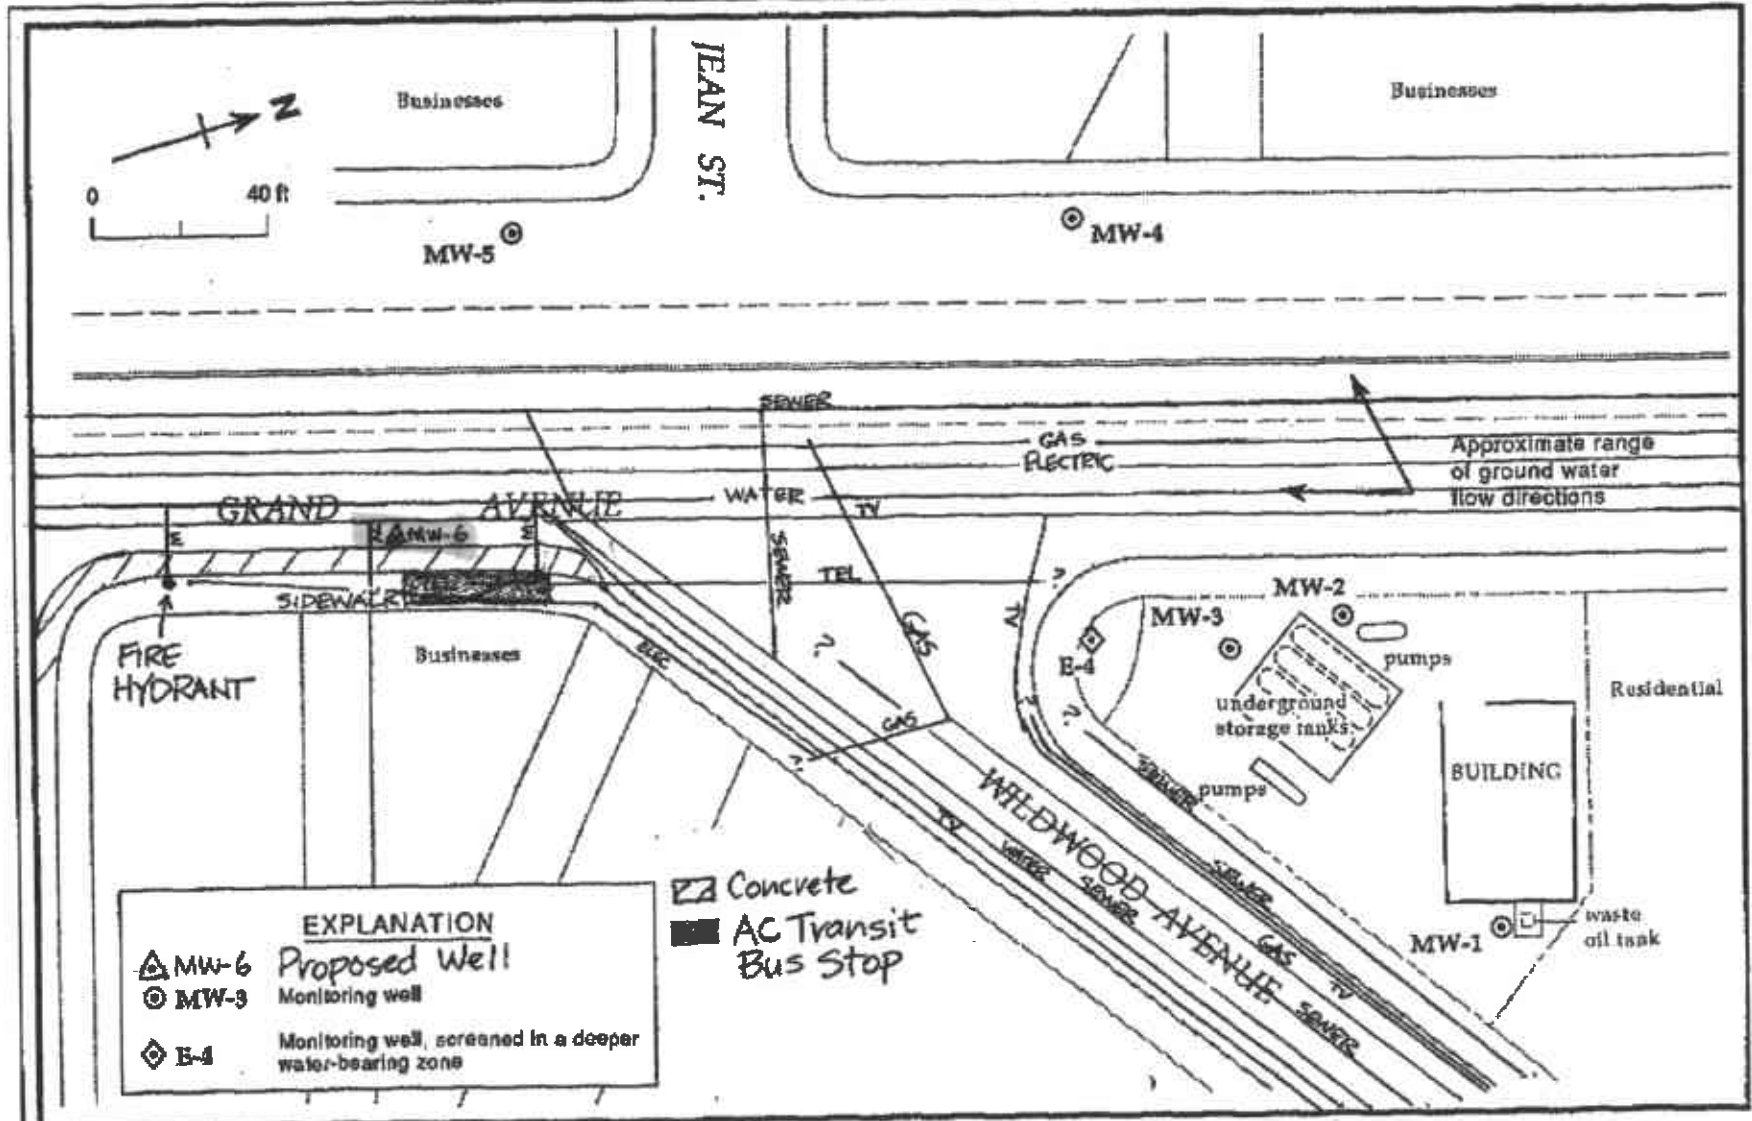

### COMMENTS & ACTIONS REQUIRED:

As you requested, here is a map with our proposed well location. We chose this location because it:

- is free of underground utility lines,
- will not require diverting automobile or pedestrian traffic during drilling and sampling the well,
- is far enough away from the street gutter to minimize surface water intrusion into the well,
- will not require blocking a nearby fire hydrant while drilling or sampling the well, and
- will allow sampling of the well without blocking the bus stop.

Please call Scott MacLeod or me if you have any questions or comments.

NOTE: Please call PAUL at (510) 547-5420 if you do not receive all pages
