

May 2, 1997

Spoke w/S. Hugo re possible non-point source
issue @ Caltrans site. She agreed if they
eliminate all possibilities of a pt. source from
the site, then refer storm H2O issues to
Brian Oliver.

3-13-98 Need to call Christo Zdaniewicz
re: Report on workplan implementation

→ ^{Abandoned} dump on site - not sure if goes to
storm drain or sewer. What needs
to be done w/pump?

→ Site management Clear for non-pt source?

Phone Log #3980

3/4/97

Left msg w/ Subhash Agarwalla to call
Re: status of work plan. Who is
working on project?

6/3/97

Left msg for Brian Oliva to call
Re: non-pt source & pump issues
as they relate to stormwater Compliance

→ fax# ²⁸⁶⁻5728 ²⁸⁶⁻5642

6/3/97

Left msg w/ Chris Zencovich (286-4914).
Left 2nd msg to Kris letting her know she
needs to submit a workplan to our
office for approval before completing
upcoming investigations

6/20/97

Discussed ^{our} letter w/ Chris.

6/25/97

Return Frank Ross w/ PSI. Discussed 6/20/97
letter.

7/28/97

Left msg w/ Chris Z. w/ Caltrans re: 7/9/97 WP.

7/28/97

Spoke w/ Frank Ross w/ PSI re 7/9/97 WP. Told
him the Dept. is not requiring the installation of
MW's as proposed in the WP. He said they realize
this but want to go ahead since it's cheaper. He
realizes they may have to re-mobilize later if they
miss the hot spots. He will ~~be~~ make sure PNAs
are analyzed for in sample from B1, B2 & B3. Asked
him to include a discussion on results from this
& past investig. as it pertains to RBCA &
RWQCB's interim guidance.

Phone Log # 3980

12/12/96

Discussed case w/ Michael Wopat of Tetra Tech. Asked him about site status. Surfaces have been repaved. Not sure where TPH oil is from - should check to see if there is any data from borings installed for support columns of I 580 -

OK w/ Michael Hilliard on this. maintenance facility has been decommissioned.

Told him we will want to:

- Confirm source & extent of TPH-oil.
- Confirm source has been removed
- Analyze for PNA's.
- Develop a site management plan that addresses prevention/protection from any exposure (eg construction worker) & mitigation measures to prevent migration of residual contamination.

Prepares a PNA

12/18/96

Called Mr. Hilliard w/ Cal Irons to discuss. He is out of the office until Jan 8.

1/14/96

Left msg w/ Mike Hilliard (286-4495) to discuss items above.

Mr. Hilliard returned my call & referred me to Subhash Agarwal @ 286-5674 in Caltron Env. Group to discuss all issues re. env. investigations. Left msg. for Subhash to call.

STTD 3480

3465 Ettie St. Emeryville 94608
Cal Trans

10/19/95

2 USTS removed 7500 gal gas / 4000 gal diesel

10/20/95

dispenser island removed - soil samples
collected underneath the dispenser no deeper than
1 ft

12/7/95

Transferred to LOP

12/4/95

Analytical results:

soil sample gas tank = 23 ppm oil, ND = d, g BTEX, MTBE

water = ND = g B, T, PHE, X = 36 ppm MTBE = 260 ppm

soil diesel tank = 560 ppm TPH, ND = BTEX, MTBE

water sample = 2,000 ppm d; ND = BTEX

↳ 170 ppm oil/grease
