5/26/05, 1138a, penny wilson, tetra tech,

6/6/05, JW is caseworker, ? Of whether all documentaion in case file, lost files or reports? Uncertain Penny just took over the sites. She wants closure now. Sites open a long time, USTs small. Discussed that size of UST not necc an indication of large or small release.

Met Roy Glenn at the site on 9/12/2005. After walking the site, the plan is to put one boring inside the building to sample soil at least to the depth of former UST. Well MW-2 is to be drilled out and re-installed at a shallower depth. A new well will be placed in the alley south of the site. Soils will be sampled continuously all the way down in the well boring. Will wait to see what we have in the shallow gw before trying to collect a deeper gw sample.

Would like to meet with me. Set up meeting for 6/28/2006 at 10:00 am.
