

Well destruction - former Exxon
349 Main Street, Pleasanton

July 1, 2002

ALAMEDA COUNTY HEALTH CARE SERVICES AGENCY
MEMORANDUM

TO Marla Guensler FROM Scott Seery DATE 9-22-94
SUBJECT Station 7-7003, 349 Main St., Pleasanton

Marla-

Hopefully you received my phone message regarding the unprotected wells at this site. I suspect you did as shortly thereafter a locking well plug was seen on the sole well previously missing such a plug. Unfortunately, very shortly thereafter, this plug was again missing and the 3 or so Christie boxes are still damaged. Enclosed are photos I took on Saturday, 9-17-94. The surface lid over the open well is missing, and at least two others are not secured, in fact, can't be secured because the boxes are damaged. Please call me at 510/567-6783 if you have questions.
