Bob Flory called on 6/13/2006. OK to install an ozone sparge system on part of site rather than fund pilot since rental of unit for three months will just about equal purchase. Destroy damaged well TW-5. Tank backfill has gone clean.

Subject: Omega Termite, 807 & 5th Avenue - drilling schedule

Jerry,

The drilling at Omega is scheduled for this next Wednesday & Thursday Feb. 15 & 16. I had intended to hold the quarterly monitoring until the new wells were drilled, but my tech got ahead of us. I'll get the report done as soon as I wade through the 4" thick stack of data that my Staff geologist brought back from DWR.
