I received a call from Ms. Normita Callison re Pacific Supply- RO514. She just received a closure order from the CUF for the site. She was inquiring as to the next step in the closure process. I admitted this was my first CUF directed closure and said she should speak with her consultant. I mentioned I thought she only needed to destroy the wells and dispose of the waste generated during the well decommissioning, but the well decommissioning should be scheduled with the well permitting agency. I congratulated her on the closure.
