Dear Mr. Guidotti,

We are in receipt of the "Quarterly Groundwater Sampling Report and Report of Subsurface Investigation," prepared by Hageman-Aguiar Inc., dated 12/8/93. This report documents the "hydropunch" sampling conducted in November 1993.

We are also in receipt of the "Report of Quarterly Groundwater Sampling," prepared by Hageman-Aguiar Inc., dated 2/3/94. Both of these reports document the generation of wastewater from such activities as well purging. Apparently, this wastewater has been accumulating at your facility. The Hageman-Aguiar reports state that this wastewater should be transported as a hazardous liquid waste under proper manifest. Hazardous wastes cannot be stored onsite for more than 90 days without a storage permit, as per 22 CCR Section 66262.34. Therefore, we request that you properly dispose of the wastewater, as well as any waste soils, and provide us with legible disposal documentation within 45 days, or by May 9, 1994.

If you have any questions, please contact me at 510-271-4530.

Sincerely,

A handwritten signature in cursive script, appearing to read "J. Eberle".

Jennifer Eberle
Hazardous Materials Specialist
