Consulting Engineering Geologists

June 10, 1994 CHO002-C

Ms. Eva Chu Alameda County Department of Environmental Health Hazardous Materials Division 80 Swan Way, Room 200 Oakland, California 94621

Subject: Non-Hazardous Special Waste Manifest Forms for Disposal of Hydrocarbon-

Impacted Soil, Former Okada Property, 16109 Ashland Avenue, San Lorenzo,

California.

Ms. Chu:

Enclosed, per your request, are six Non-Hazardous Special Waste Manifest forms with receipts for disposal of soil from the above-referenced site. The soil was generated during overexcavation, in August 1990, of a former tank pit that contained a 3,000-gallon fuel-oil underground storage tank. The soil was removed from the site in August 1993. According to Citation Homes personnel, the tanks were removed from the site by the former owner (Okada). Citation is presently attempting to locate the manifests for the disposed tanks. Information in a Terrasearch report (Supplemental Environmental Testing Results on Okata Property, Ashland Avenue, San Leandro, California, Project No. E5999), dated April 25, 1989, states water at the bottom of the gas tank excavation was pumped into a 55-gallon drum. No information on where the water was disposed is presented in the Terrasearch report. Clark & Witham, Inc. infers, however, that the quantity of water pumped from the former gasoline tank pit was less than 55 gallons. Please call if you have any questions.

Sincerely,

Clark & Witham, Inc.

Volga C. Withen
