Subject: Risk Assessment Work Plan for site located at 6701-6707 Shellmound Street in Emeryville
Attachments: PAS HHRA Work Plan Review letter.pdf; ATT00001.htm

Hi Mr. Detterman and Ms. Roe:

I have completed review of the Human Health Risk Assessment Work Plan for the referenced site. I believe the Work Plan is complete as is and it meets EPA and DTSC risk assessment guidance and requirements. A formal letter summarizing my review is attached. Please give me a call or send me a note if you have any comments or questions.

Thank you.

Subject: Review of Human Health Risk Assessment Work Plan, 6701-6707 Shellmound Street, Emeryville, California

Dear Mr. Detterman and Ms. Roe:

Enviro-Tox Services, Inc. (Enviro-Tox) has reviewed the “Human Health Risk Assessment Work Plan, 6701-6707 Shellmound Street, Emeryville, California.” The Work Plan was prepared by SLR International Corporation of Oakland, California and is dated October 2016. The Work Plan presents the methodology proposed to be used in the assessment of potential health risks posed by residual chemicals identified in soil, soil gas and groundwater under the referenced site.

Enviro-Tox has reviewed the Work Plan with emphasis on the data, methodology, and parameters proposed to be used to estimate potential health risks posed by the site. Minor grammatical or typographical errors that do not affect the evaluation have not been noted.

It is Enviro-Tox’s opinion that the Work Plan was prepared following risk assessment guidance established by the U.S. Environmental Protection Agency and the California Department of Toxic Substances Control. Enviro-Tox believes that the Work Plan is complete as presented and we do not have any comments or suggestions for improvement.

Thank you for the opportunity to review the Work Plan. If you have any questions or comments, please do not hesitate to call me.

Sincerely,
Enviro-Tox Services, Inc.

Heriberto Robles, Ph.D., D.A.B.T.
Principal Toxicologist
