**Subject: Review of Risk Assessment Reports for Site Located at 6701-6707 Shellmound Street, Emeryville, California**

Dear Mr. Detterman and Ms. Roe:

Enviro-Tox Services, Inc. (Enviro-Tox) has reviewed the following documents prepared by SLR International Corporation (SLR) for the referenced site:

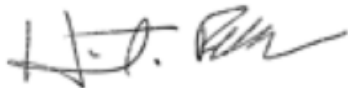

- Human Health Risk Assessment Work Plan (dated October, 2016).
- Human Health Risk Assessment Report (dated November, 2016)
- Response to Enviro-Tox Comments (dated December 15, 2016).

In their Response to Comments letter, SLR provided acceptable revisions, clarifications and explanations to the comments made by Enviro-Tox for their November, 2016 risk assessment report. We have no further comments or concerns regarding the evaluation of risks for the referenced site.

It is Enviro-Tox's opinion that the risk assessment work plan and report were conducted following risk assessment guidance established by the U.S. Environmental Protection Agency and the California Department of Toxic Substances Control. Enviro-Tox has corroborated that the conclusions and recommendations made in the risk assessment report are supported by the assumptions, models, equations, parameters and references used in the same.

Thank you for the opportunity to review SLR's reports. If you have any questions or comments, please do not hesitate to call me.

Sincerely,  
**Enviro-Tox Services, Inc.**

Heriberto Robles, Ph.D., D.A.B.T.
