Groundwater Monitoring
February 1995 Event
6707 Bay Street
Emeryville, California

RECEIVED
MAR 02 1995

ENVIRONMENTAL HEALTH SERVICES
NORTH COUNTY

Dear Ms. Hugo:

This letter records the results of a groundwater monitoring event performed by Subsurface Consultants, Inc. (SCI) at the referenced site in February 1995.

Three underground tanks which previously stored methyl isobutyl ketone and possibly methyl ethyl ketone were removed from the site in October 1989 by others. Studies conducted following tank removal indicated that soil and groundwater adjacent to the previous tanks had been impacted by past organic chemical releases. Soil vapor extraction and groundwater treatment systems were subsequently installed in 1990 to remediate contaminated soil and groundwater. The treatment systems were in operation until early 1991. Since 1991, no additional remediation has been performed. SCI implemented groundwater monitoring on a quarterly basis from May 1993 to August 1994. Monitoring well locations are shown on the attached Site Plan, Plate 1.

For this event, Wells 1, 8, 9 and 10 were sampled. Prior to sampling, water levels were measured and then these wells were purged with a clean disposable bailer until measurements of water pH, conductivity and temperature stabilized. A minimum of 4 well volumes were removed from each well. The purged water was placed in 55 gallon drums and left on-site.

After the wells had recharged to within 80 percent of the initial volume they were sampled using a pre-cleaned sampling device. The water samples were retained in pre-cleaned containers, placed in an iced

Page 2

cooler, and kept refrigerated until delivery to the analytical laboratory. Chain-of-Custody documents accompanied the samples to the laboratory.

As requested by Ms. Susan Hugo of Alameda County Health Care Services Agency (ACHCSA), groundwater levels were measured simultaneously with wells at the adjacent site. The groundwater level measurements are presented in Table 1. Groundwater surface contours for the February 1995 event are shown on Plate 1.

Analytical testing was performed by Curtis & Tompkins, Ltd., a California Department of Health Services certified analytical laboratory for the test performed. The samples were analytically tested for the following.

1. Volatile organic chemicals - EPA 8240, and
2. Total volatile hydrocarbons - EPA 8015/5030
3. Total extractable hydrocarbons - EPA 8015/3550

A summary of the current and previous analytical test results are presented in Tables 2 and 3. Analytical test reports and Chain-of-Custody documents are attached.

Conclusions

The groundwater level data indicate that groundwater flow direction is toward the south at a gradient of approximately 2 to 2.5 percent throughout both sites. Water levels are approximately 3 to 4 feet higher than levels recorded during the October 1994 event. Previous and current water levels are summarized in the Table 1.

As shown in Table 2, volatile organic chemical concentrations during the current event are consistent with previous results. As presented in the Table 3, petroleum hydrocarbon concentrations are generally lower than the October 1994 event.

Purge Method bottom bailer

FIELD MEASUREMENTS

Gallons Removed	pH	Temp (°C)	Conductivity (micromhos/cm)	Salinity S%	Comments
<u>1</u>	<u>6.44</u>	<u>57.4</u>	<u>1700</u>	_____	_____
<u>2</u>	<u>6.41</u>	<u>57.6</u>	<u>1730</u>	_____	_____
<u>3</u>	<u>6.42</u>	<u>57.6</u>	<u>1770</u>	_____	_____
<u>4</u>	<u>6.43</u>	<u>57.5</u>	<u>1790</u>	_____	_____
<u>5</u>	<u>6.44</u>	<u>57.7</u>	<u>1770</u>	_____	_____

Total Gallons Purged 5 gallons

Depth to Groundwater Before Sampling (below TOC) _____ feet

Sampling Method bottom bailed

Containers Used 4 1 1 pint

Subsurface Consultants	JOB NUMBER	DATE	APPROVED	PLATE

WELL SAMPLING FORM

Project Name: 6707 BAY ST

Well Number: MW-10

Job No.: 820.001

Well Casing Diameter: 2 inch

Sampled By: NO Dea

Date: 2/9/95

TOC Elevation: _____

Weather: Cloudy

Depth to Casing Bottom (below TOC) _____ feet

Depth to Groundwater (below TOC) _____ feet

Feet of Water in Well _____ feet

Depth to Groundwater When 80% Recovered _____ feet

Casing Volume (feet of water x Casing DIA² x 0.0408) _____ gallons

Depth Measurement Method Tape & Paste / Electronic Sounder / Other

Free Product None

Purge Method teflon builer

FIELD MEASUREMENTS

Gallons Removed	pH	Temp (°C)	Conductivity (micromhos/cm)	Salinity S%	Comments
1	6.57	51.9	1630		
2	6.69	61.3	1570		
3	6.70	60.8	1520		
4	6.69	60.2	1570		
5	6.71	60.1	1530		

Total Gallons Purged _____ 5 gallons

Depth to Groundwater Before Sampling (below TOC) _____ feet

Sampling Method teflon builer

Containers Used 4 40 ml 1 liter — pint
