Subject: Addendum to the Waste Oil Underground Storage Tank Removal Report  
Dated March 4, 1999 for Tosco 76 Branded Facility No. 11122, 3101 98th Avenue,  
Oakland, CA

Mr. Gholami:

Gettler-Ryan Inc. (GR) on behalf of Tosco Marketing Company (Tosco) prepared this letter to transmit additional analytical results to the Alameda County Health Care Services Agency (ACHCSA). During a telephone conversation on April 1, 1999 with Mr. David Vossler of GR, Mr. Amir Gholami of the ACHCSA requested a leachability test on the soil sample WO1 (10) collected from beneath the waste oil UST for the five metals (cadmium, chromium, lead, nickel, and zinc) previously analyzed. Sequoia Analytical Laboratory located in Walnut Creek, California (ELAP # 1271) was contacted and the soil sample WO1(10) was relogged for STLC five metals analysis as requested by the ACHCSA.

Soil sample WO1(10) was analyzed for STLC five metals as requested and were reported as non detectable (ND) for all constituents. The laboratory analytical reports are attached for your review. Also attached is a Site Map showing the location of soil sample WO1(10).

Based on these analytical results and per your conversation with Mr. David Vossler of GR, additional environmental assessment at this site will not be required. If you have any questions or comments, please call Mr. David Vossler at (415) 893-1515.

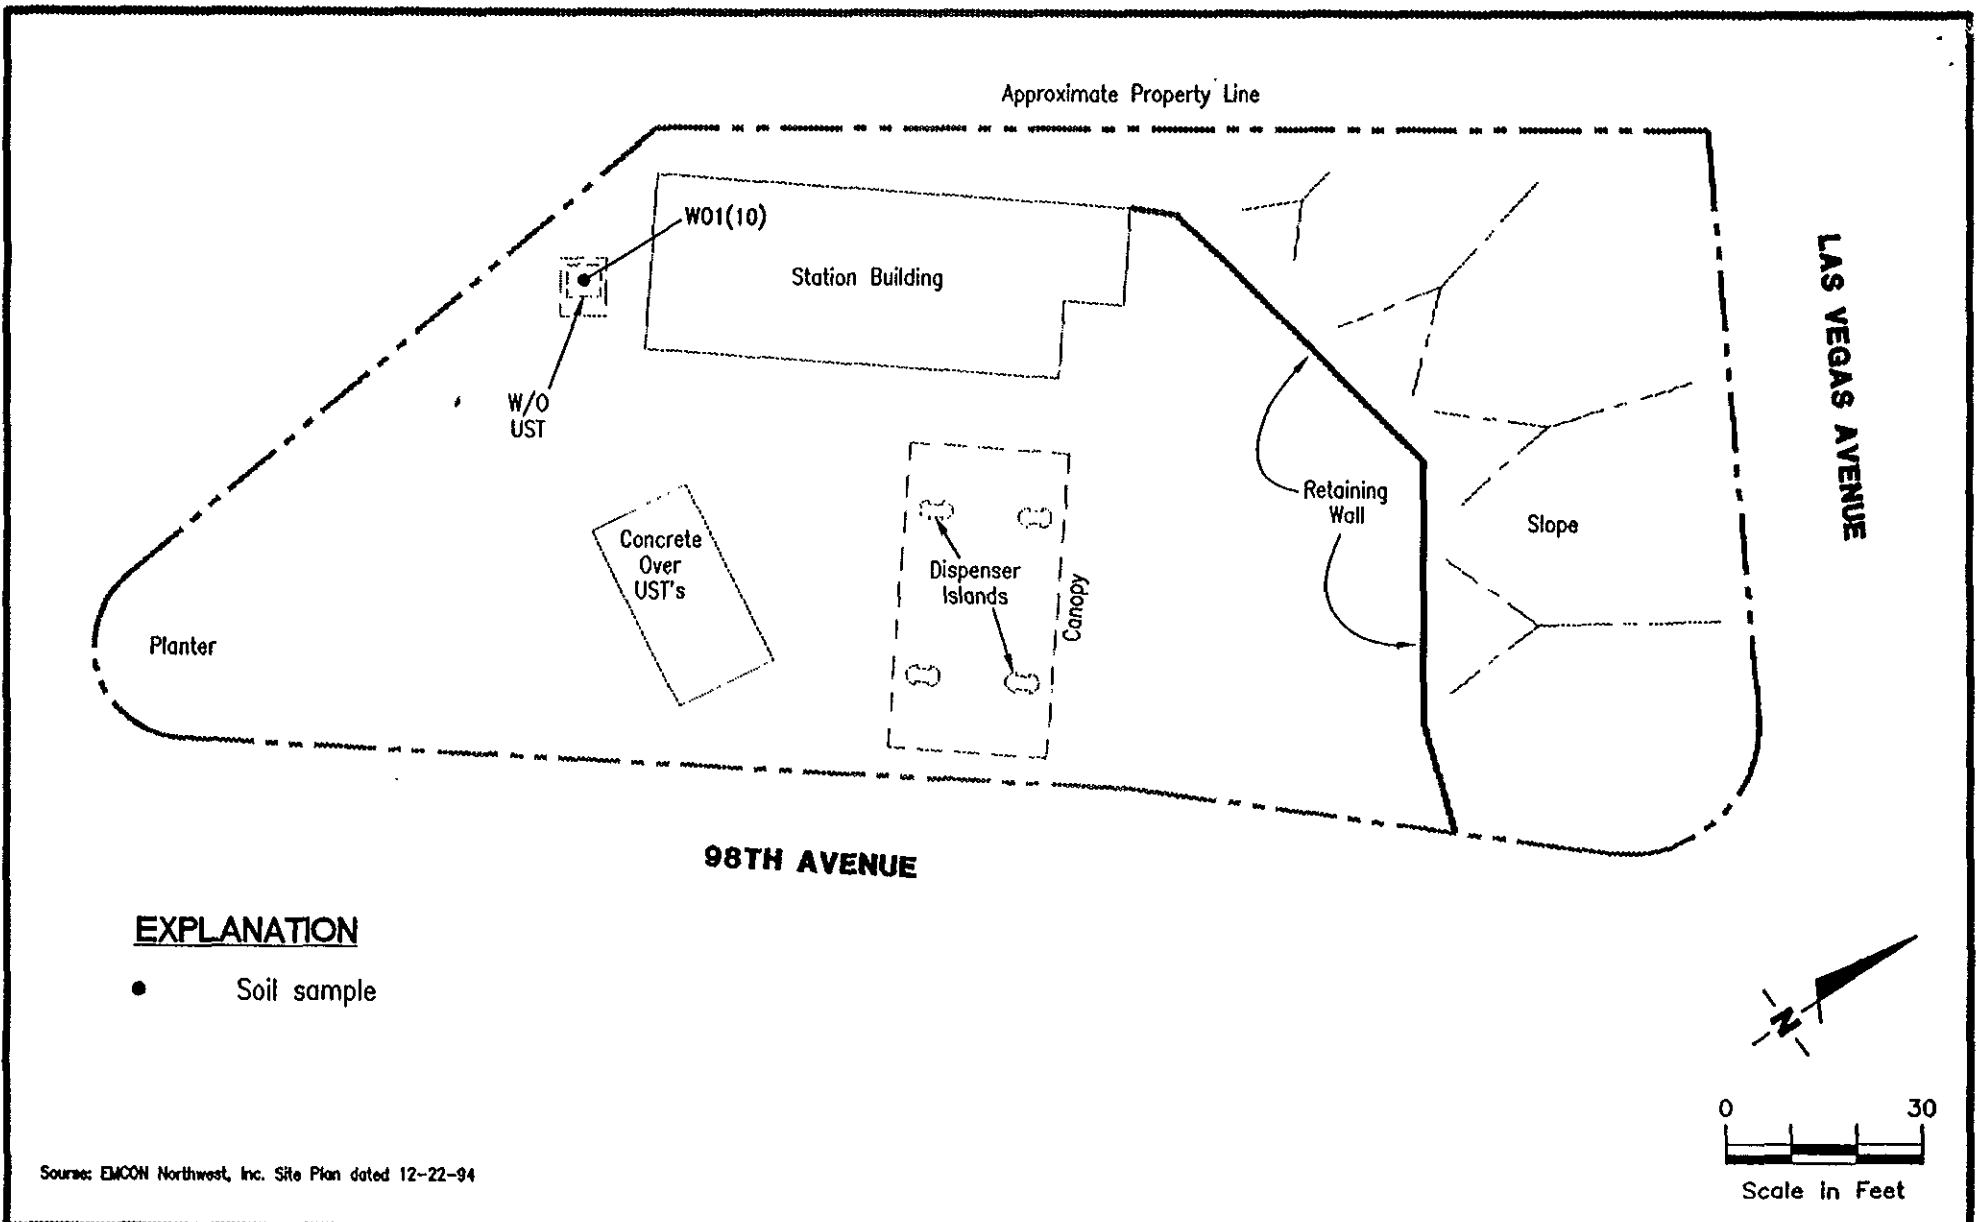

Sincerely  
Gettler-Ryan Inc.

Hagop Kevork  
Engineer  
P.E. C55734
