Subject: Sampling Results at Montgomery Ward site, Dublin

Dear Mr. Wistar:

At the request of Mr. Charlie West, we are enclosing the sampling results of the groundwater and remediation system at the Montgomery Ward site in Dublin.

If you have any questions please call either of us at (415) 829-0661.

Regards,

Daniel J. Davis

Subject: Groundwater Remediation at Dublin site

Dear Charlie:

Enclosed are the results of the last sampling of the remediation system (influent and effluent) and the groundwater at the Dublin site. Small amounts of benzene, toluene, and xylene were detected in the effluent (discharge) of the remediation system. The influent flow path has been changed to flow through the second carbon canister; we will direct and supervise Peter Guichard of West States Carbon to change the saturated carbon canister. Other than that, the contaminant levels remain virtually the same in the groundwater samples from each monitoring well. The next sampling date will be on or about June 12.

If you have any questions please call either of us at (415) 829-0661.

Regards,

Daniel J. Davis
