RE: Section 5.0 - Disposal of Contaminated Soil - Final Report
Underground Storage Tank Closure, Oliver Rubber facilities,
1200 65th Street, Emeryville, CA.

Mr. Kessler:

Enclosed please find transport manifests, signed by the respective disposal facilities, which document the final disposition of approximately 200 cubic yards of hydrocarbon contaminated soil. The soil was generated during the removal of underground storage tanks at the Oliver Rubber facility located at 1200 65th Street in Emeryville, CA. All soil excavated during the tank removal is accounted for on these documents.

On December 30, 1991 approximately 80 cubic yards of soil were transported to and landfilled at the McKittrick Waste Management Class II facility in McKittrick, CA. On the same day 40 cubic yards of soil were transported to and landfilled at the Browning Ferris Class III facility in Livermore, CA. The remaining 80 cubic yards of soil were transported to and landfilled at the Browning Ferris Class III facility, Livermore, CA on February 4, 1992.

If you have any questions regarding this correspondence or the project please contact me at (510) 685-6700.

Respectfully,
AQUA SCIENCE ENGINEERS, INC.

David C. Prull
Project Manager
