For Steve: 10/25

- 1) No requirement to excavate any of the backfills.
- 2) Do you feel there is an additional need for more characterization in the south (B.2.)
- 3) Should an additional M.W. be installed between MW 1 and MW 5?
- 4) Should the hydraulic properties of the aquifer be characterized?
- 5) Potential of contamination migrating toward deeper aquifer - is more stratigraphic
