Discussed comments/questions on RA w/
Mag Mendoza, SCL. Refer to Notes ("Questions")
sheet in files.

PHONE LOG (718 San Pablo Ave.)

9/31/94 Joe Thewin, CAMBRIA (510) 420-0700

I requested Mr. Thewin to submit a more elaborate explanation for not submitting the metals analysis in the report. He said he would address it in next quarterly report. I asked why the sample turnaround time exceeded 14 days. He stated that it was less than 14 days for extraction, but not analysis. He stated that extraction is what counts for beginning analysis. I requested CAMBRIA to include VOC analysis in next glulis.

12/14/94 Contacted Joe Thewin, CAMBRIA, for status of qtrly report submittal. Due to "coordination problems" the sampling was only conducted yesterday. The qtrly report will be in by mid January '95.

3/22/95 Left message for Cambria to include our letter w/ glulis w/ RL's signature in future.

7/22/96 Spoke to Jonathan Redding, attorney for Don Strough, (510) 451-3300. Don Strough's new address is:
1300 Concord Ave.
Concord, CA 94520
Concord Honda Pontiac } (510) 825-8000 Ext #180/

Explained work that is required.

11/22/96 Meg Mendoza, Subsurface Consultants, 299-7960, called to say submittal of risk assessment will not occur until Christmas because they are still waiting for more sample results.

12/24/96 Meg Mendoza called to request an additional extension for submittal of RA until end of Jan '97.

1/14/97 Meg Mendoza requested another extension to the end of Feb '97. ok

PHONE LOG (718 San Pablo, Albany)

10/25/93 Left message for Roxanne, Subsurface Environ. Cons., to see what the status is on the Tank Removal Report.

12/6/93 Larry Cole, City of Albany & Juliet Skini
Mr. Cole expressed concern over the backfilling & cementing over of tank pits at the site. I explained that this was okay as long as they addressed remediation of the soil & groundwater through in situ methods. Mr. Cole requested that I write a letter to him explaining what it will be required at the site. He also mentioned that the site was flooded in the last rains. I said that it may be better, than, that the pits were backfilled. Mr. Cole stated that Marvin Collins Construction Co. is currently working on remodeling the site. Larry Sanchez is the contact there. His ph # is 525-1562.

12/15/93 Roxanne, Subsurface Environmental, called and gave the ^{new} VRP name & address and the other person who should be copied on the letters since he is the current property

Kurt Egan, ICF Consultants (570) 419-5412

Subject: Stein

RE: 798 San Pablo, Albany (Vol Strong)

Mr. Egan called to request an extension for the work plan due date by 30 days. Currently, the work plan is due by July 6 '93. The reason he is requesting an extension is because financial arrangements & the signing of the contract won't take place until possibly some time next week. Until then, he can't start on work. Therefore, I granted him the 30-day extension and his the work plan is now due by ~~on~~ Aug 6 '93.
