

Phone Log (2222 Grant Ave)

- 1/16/95 Returned Fran Maroni's call re: status of case closure recommendations. Told her site will be reviewed by ALCO + RWQCB & they should hear from us by April 1st.
- 3/13/96 Call to Darin Reinholdt requesting report on OE dated after 9/20/93
- 3/29/96 Call to Frances Maroni re: fate of stockpiled soil. She said she would review their files & fax info as. ap.
- 4/29/96 Called / left msg w/ Jim Burress that RWQCB concurs w/ case closure & that they should proceed to destroy MW's per our letter of 4/29/96
- 5/8 + 9/96 Returned Fran Maroni's call from 5/8. Told her status of CCS & faxed her a copy of well destruc. request letter.

Phone Log (2222 Grant Ave)

- 6/28/95 Called Fran Moroni to let her know after discussing this site w/ J. Shin & (E. Chew), we feel it is more approp. to sample on a semi-annual basis rather than annual. Also, ~~after~~ it may be approp. to complete a gw investigation out from MW1 to verify contamination boundaries before applying for closure.
- 7/31/95 Mr. Burress called to discuss our letter dated 7/25/95. ~~After~~ We discussed the need for semi-annual sampling v annual. I told him after 2 more sampling events we could reassess & look to reviewing case for closure.
- 9/26/95 Spoke w/ Jim Burress w/ Marco to let him know that I rec'd his fax & that I believed this ~~site~~ site may be ready for closure soon. I asked him if he had gotten TDS data - he told me to contact Fran Moroni.

Called Fran Moroni who indicated she was preparing a ^{GWS} report. TDS was 5910ppm MW1, 1240ppm MW2 & 4690ppm MW3. Benzene was ND in all 3 wells. I told her to send us the report & we would review for closure. I called back Jim Burress & told him the same.

PHONE LOG (2222 Grant Ave.)

- 12/7/93 Markus Neubach, Hydro Environmental Inc, 521-2684 & Subject Skin
Mr. Neubach stated that a work plan for PSA will be submitted by Dec 17 '93.
- 12/27/93 Left message for Markus Neubach re. overdue work plan.
- 3/1/94 Left message for Scott Kelstrott regarding the submittal of the UST leak report form.
- 6/9/94 Spoke to Scott Kelstrott, Hydro Environ. Mr. Kelstrott stated that work plan was implemented & that a draft report was submitted to the contact person at Therco, Jim Burress, for his review. Mr. Burress is on vacation til the end of June '94 & would get a chance to review draft til July. Mr. Burress' phone # is (510) 276-3000 #409. Sitting in as Mr. Burress' contact is Steve Nelson, whose ext. # is 539. JS
- 6/9/94 Left message for Mr. Nelson requesting he get back to me w/ a committed date for when report will be submitted. I also asked for OLR.

6/28/95 Fran Maroni called to ask if we had rec'd her letter. I told her we had rec'd it & was in the process of responding. She said RP wants to reduce sampling frequency to annual event & is not in "a rush" to get to closure. I told her that annual sampling would lengthen time to get to closure & would like to review to see what we would need to ask for closure. I will respond in 3 weeks.

RE: 2222 Grant Ave., San Lorenzo

back to him on the water issue &
that I may come out to the site
this week to take a look at pit.

Mr. Nelson stated that he went
ahead and pumped the water from the
pit last week and it hasn't recharged.
He stated that he is storing the
pumped water in approximately
3 55-gallon drums. I requested
that he not dispose of these drums
yet since we may request a
sample from this water. Mr. Nelson
stated that he would go ahead &
have his consultant collect a soil
sample from the stockpiled. I stated
that he must have this done ASAP
before the soil has chance to volatilize.
Also, I reminded him that this
sample must be collected from w/pit
the pits & not from its surface.
I told him that I would get
