

Dave Nielson - DECON

- missing disposal docs

soil

GW

FP

11/5/99

Call w/ Dave Nielson (Decon) re: docs for disposal of soil, GW, FP. He said soil pile is still at site and UST is still open (not cement capped, yet). Receipts of FP/GW disposal were already sent to HFD.

Called H. Murphy (HFD). Told Hugh of my needs. He will work on all outstanding tasks ASAP.

01/04/00

- Call (message) to Stephen Southern (ACC) to inquire about stockpile

1/5/98

Based on these results (and knowledge of the site), I informed Mr. Southern that it appeared "OK" to restore the excavation, but that it would be advisable to place a well screen in the pit to serve as a means to extract/sample GW in the future. He said he had already suggested this to his client and was prepared to do so.
