

5-24-94 Informed Roxanne to remove soil from excavation. After purging the groundwater twice, resample <sup>water</sup> and submit to lab for analysis. If no water, take 4 sidewall samples. Sample should also be tested for lead.

11/30/94 Spoke to Larry Sato re tank removal at site. Larry stated that there was no evidence of holes in tank.

I discussed case w/ Mr. Craven. I asked him whether the RPs had any alternatives for supplemental investigations to work towards closure. Mr. Craven stated that if the pit is still open, our "grab" g.w. sample could be collected to confirm ND results. Also, he stated that the 4 quarters minimum of monitoring did not have to apply.

12/6/94 Left message for Fred Delaney

1/11/95 Called Subsurface Division & requested that they submit a completed UCR in order to consider site for closure.
