11/29/90 Q202 San Pablo Ecille drilling 4-5 wells
- original closure identified tanks as gasoline
so sample analysis consisted only of TPH + BTEX.
Wanted to know if full w.o. scan required on
soil samples collected from borings.
Yes + No I said, I want an 8270 end
heavy metal scan on two of the four
wells in addition to the TPH + BTEX,
One should be located closest to former tank
location, other site selected left to
discretion of consultant
