Mr. Tadashi Nakadegawa
Senior Architect
Department of Facilities Management
Oakland Unified School District
955 High Street
Oakland, CA 94601

Dear Mr. Nakadegawa:

Enclosed you will find a draft of Construction Testing and Engineering, Inc.'s (CTE's) report on the 900 High Street soil contamination sampling exercise. The report is noted as a "DRAFT" only because of the absence of a signature by CTE's Environmental Engineering Manager. At my request this draft was prepared and sent without the signature to speed your response to Alameda County's Department of Environmental Health. As soon as he returns, the Engineering Manager will sign off on this report and you will be sent the final report.

This report includes the project objective, site description, field investigation and observations, laboratory results, conclusions and investigation limitations. The report also includes a site location map and a detailed site plan. The appendices contain the site workplan, soil boring logs and detailed laboratory analyses results.

For your information a copy of this cover letter and the report have been sent to Mr. Barney Chan of Alameda County and a copy of this cover letter (only) has been sent to Ms. Sue Woehrle, Deputy Superintendent.

The next step will be taken by the County. It will decide whether to close out this investigation, require the installation of monitoring wells or something in between.

If you have any questions please call me.

Sincerely,

James E Sharp
Vice President, Technical Operations
