RE: EDGEWATER INTERNATIONAL TRUCKS, 390 DOOLITTLE DRIVE, SAN  
LEANDRO

Dear Mr. Mazzella:

After our phone conversation today I located the case file for the subject site. The county apparently referred this case back to the City of San Leandro at their request (see attached letter). Therefore, please contact Mike Bakaldin of the San Leandro Fire Department (510/577-3331) should you have any questions regarding case status.

Sincerely,

  
Scott Seery, CHMM  
Senior Hazardous Materials Specialist

RE: EDGEWATER INTERNATIONAL TRUCKS, INC., 390 DOOLITTLE DRIVE,  
SAN LEANDRO

Dear Mr. Mazzella:

At the request of Mr. Mike Bakaldin of the San Leandro Fire Department, this office has referred oversight of the ongoing environmental investigation at the referenced site to the city of San Leandro ("City"). The fire department, as you are likely aware, is the local implementing agency (LIA) for underground storage tank facilities in the City. This change in oversight responsibility should aid both the LIA and responsible party in coordinating recent site activities with those of the past, and to streamline and prevent duplicity of agency involvement.

Please call me at 510/567-6783 should you have any questions.

Sincerely,

Scott O. Seery, CHMM  
Senior Hazardous Materials Specialist

Mr. Larry McFadden  
Operations Manager  
Edgewater International Trucks Inc.  
390 Doolittle Drive  
San Leandro, CA 94577

Dear Mr. McFadden:

As a follow up to our telephone conversation today I have enclosed the "Tri-Regional Board Staff Recommendations for Preliminary Evaluation and Investigation of Underground Tank Sites", August 1990. This information is considered a guidance document for the process of site investigation leading ultimately to a site closure. Also included in the packet of information is an outline to be used in preparing the workplan for the site investigation.

You will also need to complete and return the enclosed "Unauthorized Release Report". This report is required when an underground storage tank has leaked into the environment as yours did.

After reviewing the information please contact me with any questions you may have about the subsurface investigation required at your site.

Very Truly Yours,

Robert Weston  
Hazardous Materials Specialist
