SUBJECT: REMOVED WASTE OIL TANK SITE

Dear Mr. Miller:

Find my entire file on this matter, I would appreciate you reviewing this file and responding specifically as to what is needed to obtain clearance on this site from your agency.

It would seem to me that I have complied with Mr. Faulhaber's requests and that a clearance would be in order.

Looking forward to a quick and positive response.

Sincerely,

Larry McFadden
Rental/Lease Manager

RE: UNDERGROUND STORAGE TANK POLLUTION LIABILITY

Dear Mr. McFadden:

As you know, we have been working with Agricultural Excess and Surplus Insurance Company (AESIC) in obtaining a quotation for Underground Storage Tank Pollution Liability coverage. Unfortunately, AESIC has advised that they are declining to quote due to unacceptable financial underwriting criteria based on the following:

1. Since they do not have the Alameda County's response to the groundwater contamination discovered at the time of the tank removal, they cannot determine whether this site is considered a class "C" site and cannot be quoted.

In order to give this further consideration, we will need the county's response to the cleanup. If you are having trouble obtaining this information, AESIC will call the county for you. They will, however, need to know the spill number assigned to your case before they can call.

As it stands now, AESIC can not provide a quotation. However, if you should have any information that may alter their decision, please be sure to let me know. Please call with any questions.

Best regards,

Carol Ruecker

REGARDING: UNDERGROUND STORAGE TANK APPLICATION YOUR LETTER
OF 9/26/91

Dear Ms. Ruecker:

A belated response to your inquiry about our waste oil tank spill and subsequent removal. Find copy of proposal/contract from West Coast Tank Testing for the removal of this tank.

Find further copies of (3) checks totaling \$8,500.00 or \$5,250.00 more than contract called for which represents fees, for the removal of contaminated soil found when tank was dug up.

September 1990 I requested from Alameda County, Department of Environmental Health a release on this removed tank.

Mr. Faulhaber of the agency attended the sampling of the water from the monitoring well next to the removed tank (see inspections 8/3/90, 9/5/90) also see Chips Environmental Consultants test results dated 9/29/90. EW#1 is the monitoring well next to removed waste oil tank, EW#2 is monitoring well next to Diesel Fuel Tank.

After submitting this data to Alameda County no release was forthcoming I contacted them in February of 1991 and found that Mr. Faulhaber had been replaced. Therefore I am back to square one, to get this site closed and or released.

Additionally please find our latest water test on monitoring well EW#2 next to our Diesel Fuel Tank.

Please feel free to contact me for any additional information you may require.

Sincerely,

Larry McFadden
Rental/Leasing Manager

We hereby propose to furnish the materials and perform the labor necessary for the completion of

1. Break and remove concrete and/or asphalt.
2. Excavate (1) 550 gallon tank
3. Soil samples are time and material
4. All dirt and debris to be pushed back into hole, unless ground is contaminated.
5. If ground is contaminated, dirt will be removed at \$275. per cubic yard. There will be an extra charge depending upon the amount of contaminated soil removed for - excavation fees, soil samples, compaction and back fill.
6. All work done in compliance with all local, state, and federal regulations.
7. All permits required by interested agency's.
8. Excavation quotations are based on normal soil conditions. In the event of unstable soil, unforeseen structures, cables, debris, conduits, rock or High water table are encountered, the contractor shall not be held responsible. You will be notified of the problem and corrective measures can be done on a time and material basis until normal conditions are corrected.
9. Liability insurance of \$1,000,000.00
10. Replace all asphalt and/or concrete disturbed by this project

All material is guaranteed to be as specified, and the above work to be performed in accordance with the drawings and specifications submitted for above work and completed in a substantial workmanlike manner for the sum of

Dollars (\$ 3,250.00)

with payments to be made as follows: \$2,500.00 Upon Break and Remove
750.00 Upon completion of job.

Any alteration or deviation from above specifications involving extra costs, will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents or delays beyond our control. Owner to carry fire, tornado and other necessary insurance upon above work. Workmen's Compensation and Public Liability insurance on above work to be taken out by

Respectfully submitted

Per

CONSTANTINE P GOUIS

Note—This proposal may be withdrawn by us if not accepted within ... days.

ACCEPTANCE OF PROPOSAL

The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as outlined above.

Comments:

No on-site inspection. Phone call only.

(1) Larry McFadden called. Asked about sampling well at site of used oil tank (pulled in 87). Said Edgewater was told by Mike Bakaladin of SL to sample wells & send results to us. (Was sampled only once before, in 87, he said)
(2) Advised him on tests to run on sample and on finding people to do the sampling.

(3) Told him if sample was clean I would allow closing of site.

(4) Told him if or other county person must witness sampling.

RE: Water samples at Edgewater International Trucks Inc.,
390 Doolittle Drive, San Leandro, California

Dear Mr. McFadden

Attached is the analytical report for the two water samples
taken at the subject facility on 9-5-90.

Each well was purged of four well volumes prior to sampling.
The Ph, conductivity, and temperature were monitored to
equilibrium to ensure a representative sample. Bailer
blanks were prepared for each of the two bailers used.
The samples were then chilled, and transported to our
laboratory for analysis. Full chain of custody was
maintained and is on file.

NOTE: A trace amount of petroleum hydrocarbons was detected
in the samples.

If you have any questions regarding this report, please feel
free to contact us at your convenience.

Sincerely,

A handwritten signature in black ink, appearing to read "Bruce McEvers", written over a horizontal line.

RE: Groundwater sampling and analysis at Edgewater
International Trucks, Inc., 390 Doolittle Drive, San Leandro

Dear Mr. McFadden

Attached is the analytical report from Sequoia Analytical of
Redwood City, for the one water sample taken at the subject
facility on 9-5-91.

The well was purged of four well volumes of groundwater
prior to sampling. The well was purged and sampled using a
Teflon bailer. The sample was stored in zero headspace VOAs,
and a 1 liter amber bottle, labeled, and chilled for
transport. Full chain of custody was maintained and remains
on file. The sample was analyzed for TPH as Diesel (EPA
8015) and BTEX (EPA 8020).

NOTE: No detectable levels of diesel or its constituents
were found in the sample taken.

If you have any questions regarding this report, please feel
free to contact us at your convenience.

Sincerely,

Bruce McEvers
