RE: Case Closure - Dougherty Regional Fire Authority  
7494 Donahue Drive, Dublin, California 94568

Dear Mr. Diekman:

The Alameda County Department of Environmental Health, Environmental Protection Division has recently received concurrence from the Regional Water Quality Control Board regarding this office determination that no further action is required concerning the removal of three underground storage tanks ( 1 -4,000 gallon gasoline, 1 - 500 gallon gasoline and 1 - 500 gallon diesel) at the referenced site.

Please be advised that the three groundwater monitoring wells (MW-1, MW-2 and MW-3) at the site must be properly decommissioned before our agency will issue the **Remedial Action Completion Certification** (closure letter) for the subject site. A report must be submitted documenting the abandonment of the monitoring wells.

Additionally, you will need to notify this office 72 hours in advance of the well abandonment field activities.

If you have any questions concerning this letter, please contact me at (510) 567- 6780.

Sincerely,

A handwritten signature in cursive script that reads "Susan L. Hugo".

**Subject: QMR for Fire Station No. 1, 7494 Donohue Dr., Dublin**

Dear Mr. Hathcox:

I have completed review of BSK's January 1994 First Quarterly Groundwater Monitoring report for the above referenced site. The existing three monitoring wells have been sampled for two consecutive quarters.

Analysis for total lead may be eliminated in future sampling episodes. Because all the wells appear to be downgradient from the former UST pit, analysis of hydrocarbon constituents must be performed for all water samples collected. After two more sampling quarters, this site will be evaluated for case closure.

If you have any questions, I can be reached at (510) 271-4530.

Sincerely,

eva chu

San Ramon, CA 94583

Dear Tom:

As you requested, I have prepared a short note indicating formally that the Hageman-Schank work plan for Dougherty Fire Station #1 (7494 Donohue Dr., Dublin) is acceptable to this office. The proposal states that aerated soil was replaced in the former tank pit, that the pit was asphalted over, and that three monitoring wells will be installed around the pit and sampled on a quarterly basis.

I look forward to working with Bruce Hageman and you on the ongoing work at this site; if you have any questions about this letter, please feel free to contact me at 271-4320.

Sincerely,

Gil Wistar  
Hazardous Materials Specialist
