John Watson, Red Cross (415) 202-0661  
v. Juliet Shui

RE: 2017 Control, Alameda

---

I reviewed your work proposal  
& told Mr. Watson that the proposed  
borings should not be placed in  
exact same locations as samples  
APC 7 & 8, but rather, they  
should be located further out  
from the excavation to delineate  
extent of soil contamination.

Ed Marshall, Red Cross 874-7200  
Juliet Skir

RE: 2017 Central Ave, Nevada

Mr. Marshall called to request an extension for the due date of the work plan to Aug. 19, 1993. This extension was granted. At this point, they have received one proposal from a consultant and are having another consultant look at this proposal.

Mr. Marshall asked whether this site can be considered a residence since there is a house on site that was used as a residence in the past. This house is currently being used as a place for charity work of the Red Cross. The tank that was removed was a home heating oil tank that was used for a residence.
