RE: CHERRY CITY NURSERY, 1034 PERALTA AVENUE, SAN LEANDRO

Dear Mr. Frey:

This office is in receipt of the November 19, 1993 Levine-Fricke work plan for the assessment of ground water underlying the referenced site. This plan was subsequently amended December 27, 1993. The amended work plan proposes the advancement of four (4) borings, analysis of soil samples collected at 5-foot intervals, where possible, as each boring is advanced, and the analysis of ground water samples collected, using the "hydropunch" method, from the saturated, undisturbed formation below the terminus of each boring.

The cited Levine-Fricke work plan, as amended, has been accepted.

I understand that field work is slated for the first week of January 1994. Please call me at 510/271-4530 to confirm the specific date, and if you have any questions or comments.

Sincerely,

Scott O. Seery, CHMM
Senior Hazardous Materials Specialist
