Phone log (2610 Northridge Ave.)

2/17/96

Walter Sage w/IT called to see the status of case closure for this site. (He called in December also - I ~~just~~ forgot to log the call). I told him this case is on my stack to review for closure but it has not been looked at yet. However, I did tell him it is 2nd in line for review and would see if someone else in the office had time. If not, it would be approx. 4 weeks before I could get to it. In any event I promised I would write him a letter giving time frames after we determine if it qualifies for closure.

PHONE MEMO:

I spoke w/ Michael Miller (IT Corp) today re: results of soil/water samples collected during UST closure at this site. The results follow:

Three (3) sidewall samples: 4th Sidewall sample =
2 = "ND" 430 ppm
1 = 12 ppm TPH-G
Water sample:
7,900 ppb TPH-G
110 E
110 X
