

Contact Log (701 San Pablo)

7/9/96 Spoke to Ingrid Warner. Tanks ~~have~~ ^{was} not used since Chumson occupied site over 10 years ago.

Explained next steps to Ms. Warner.

7/9/96 Rhonda, SEMCO, requested that SEMCO analyze the soil sample collected at 8' bgs from bottom of pit.

9/19/96 Left message w/ Rhonda, SEMCO, for Mr. Klemtson w/ questions re w.p.

9/30/96 Make Depert, SEMCO, - work will begin on Fri, Oct 4 '96.

12/3/96 Spoke to Stan Klemtson. He said that a report documenting work at the site would be submitted w/in next two weeks.

1/14/97 Called Bob Haas, HML Lab, 570-540-2803

Asked the following:

- 1) Whether a silica gel cleanup could be applied to 5520F analysis
- 2) Whether biogenic material is non-polar
- 3) What range of carbons are identical to TEPH & what constituents would be identified in this analysis (e.g. TPH₉, TPH₁₀, Oils, Kerosene, naphthalene, etc.)

1/14/97 Discussed my comments on report w/ Stan Klemtson. He said he would fax copy of field notes that were not included in report.

2/11/97 Denis Milano, SEMCO, called to discuss site & required workplan. Agreed that two additional borings, as opposed to one well & one boring, would be acceptable for the time being.

4/28/97 Keith Craig, SEMCO, said field work will commence on May 6, 1997.

7/25/97 Polly Higgins, 510-525-9220, called to say Ingrid Warner is in hospital + cannot afford to pay for required work. I asked whether Ms. Warner filed for State Trust Fund. Ms. Higgins said she thinks they did.

7/25/97 Cheryl Gordon, State Trust Fund, said that no one filed for reimbursement for this site.
