

10-4-90 Meeting with the following persons present:
Ken Friedman, Property Owner
Jon Benjamin, Attorney
Bill Molzer, Ph.D., Aqua Terra
Gil Wisler
Cary Seto

It was agreed upon that no further action was required on Friedman's part other than monitoring MW-1 on a quarterly basis for a year. After this period, his monitoring schedule can be re-evaluated. He will not be required to excavate further. It appears the contamination found in MW-3 is coming off-site from the Chevron car wash. Bill Molzer in his final tank closure report will ~~identify~~ identify what we agreed upon in our meeting today and I will write him a letter of concurrence.
